PRESENTS

RECEIVED BY THE

ROYAL SOCIETY,

From November 1811 to June 1812,

WITH THE

NAMES OF THE DONORS.

1811.

PRESENTS.

DONORS.

The Commissioners of Public Records.

The Geological Society.

Asiatic Researches, or Transactions of the Society instituted in Bengal, for inquiring into the History and Antiquities, the Arts, Sciences, and Literature of Asia. Vol. X. and XI. 4°

Asiatic Society.

The Transactions of the Linnean Society of London. Vol X. Part II. 4°

The Linnean Society.

Medico Chirurgical Transactions, published by the Medical and Chirurgical society of London. Vol. I. 8°

The Medical and Chirurgical Society.

Hortus Elginensis, or a Catalogue of Plants, indigenous and exotic, cultivated in the Elgin Botanic Garden in the Vicinity of the City of New York, by David Hossack, M. D. &c. 2 copies. 8°

Dr. David Hossack.
Nov. 7. A Statement of Facts relative to the Establishment and Progress of the Elgin Botanic Garden, and the subsequent disposal of the same to the State of New York, by David Hossack, M. D. 2 copies. 8°

Lectures on the Elements of Algebra, by the Rev. Bewick Bridge. 8°

A compendious and practical Treatise on the Construction, Properties, and Analogies of the Three Conic Sections, by the Rev. Bewick Bridge. 8°

A Journal of Natural Philosophy, Chemistry, and the Arts. No. 134—138. 8°

The Philosophical Magazine for July, August, September, and October, 1811. 8°

The Critical Review for July, August, September, and October, 1811, and Appendix to Vol. XXIII. 8°

Recherches Physico Chimiques, par M. M. Gay Lussac et Thenard, 2 Vols. 8°

Projet d'une Académie Asiatique. 4°

Nouvelles Méthodes pour la Détermination des Orbites des Comètes, avec un Supplement, &c. par A. M. Legendre. 4°

Essai sur la Théorie des Nombres, par A. M. Legendre. 4°

Théorie de la Double Refraction de la Lumière dans les Substances Cristallisées, par E. L. Malus. 2 copies. 4°

Nov. 14. L'Allegro Miltoni Poema Latine Reddutum a C. M. 4°

Meteorological Journal and Astronomical Observations made at the Observatory at Madras in 1810. MS.

Directions for Sailing to and from the East Indies, China, New Holland, Cape of Good Hope, and the interjacent Ports, &c. by James Horsburgh, Esq. F. R. S. Part II. 4°

A Dictionary of the Malayan Language, by Wm. Marsden, Esq. F. R. S. 4°

Table to calculate Interest and Salaries. 4°

Dec. 5. The Philosophical Magazine for Novemb. 1811. A Journal of Natural Philosophy, Chemistry, and the Arts. No. 139. 8°

The Critical Review for November, 1811. The Botanist, being the Botanical Part of a Course of Lectures on Natural History, by Benjamin Waterhouse, M. D. 8°

Dr. David Hossack.

Rev. Bewick Bridge.

Mr. W. Nicholson.

Mr. A. Tilloch.

The Proprietor.

M. M. Gay Lussac and Thenard.

By the Author.

M. Legendre.

M. E. L. Malus.

C. Marsh, Esq.

Court of Directors of the Hon. East India Company.

James Horsburgh, Esq.

Court of Directors of the Hon. East India Company.

Wm. Marsden, Esq.

Goodwin, Esq.

Mr. A. Tilloch.

Mr. W. Nicholson.

The Proprietor.

Dr. B. Waterhouse.
1811.

1812.

Medico Chirurgical Transactions, published by the Medical and Chirurgical Society of London. Vol. II. 8°
An Inquiry into the Process of Nature, in repairing Injuries of the Intestines, &c. by Benjamin Travers. 8°
Dissertatio historico-critica de Missionum Chimicarum simplicibus et perpetuis rationibus earumque Legibus nuper detectis Sectio I. Auctore Lud. Guill. Gilbert. 4°
Siao çu iin; or a small Collection of Chinese Characters analysed and decoumpounded, &c. by Stephen Weston, B. D. F. R. S. 8°
Philosophical Magazine for December, 1811.
A Journal of Natural Philosophy, Chemistry, and the Arts. No. 140—141.
The Critical Review, for December, 1811.

23 A Survey of the South Coast of China, and of the Paracels, by Lieut. Ross and Maughan. 9 Sheets.
State of the Prisons in England, Scotland, and Wales, by James Neild, Esq. 4°

A new Interpretation of the 86th Psalm, and an Exposition of the 110th Psalm, by the Rev. Richard Dixon. A. M. F. R. S.

Feb. 6. Archaeologia, or Miscellaneous Tracts relating to Antiquity, published by the Society of Antiquaries of London. Vol. XVI. 4°
A Journal of Natural Philosophy, Chemistry, and the Arts. No. 142.
The Philosophical Magazine for January, 1812.
The Critical Review for January, 1812, and Appendix to Vol. XXIV.
A Lamp, called the Illuminator.

The Mausoleum at Castle Howard.

Donors.

Institute of France.

John Wilmot, Esq.

The Medical and Chirurgical Society.

Benj. Travers, Esq.

Rev. Robert Hodgson.

D. L. G. Gilbert.

Rev. Stephen Weston.

Mr. A. Tilloch.

Mr. W. Nicholson.

The Proprietor.

Court of Directors of the Hon. East India Company.

The Society for the Discharge and Relief of Persons imprisoned for Small Debts.

Society of Antiquaries.

Mr. W. Nicholson.

Mr. A. Tilloch.

The Proprietor.

Benj. Count Rumford.

Dr. A. Munro, jun.

The Earl of Carlisle.

Mr. W. Nicholson.
1812.

Presents.

19. Travels in the Island of Iceland during the Summer of the Year 1810, by Sir George Steuart Mackenzie, Bart. F. R. S.

23. A Series of Plates of the Brain, with References exhibiting the Appearances of that Organ in the different Stages of Dissection, and Descriptions of the same, with Directions for the Development of that Organ by Dissection, &c. by Alex. Ramsay, M. D. 4°

Donors.

Mr. A. Tillock. Mr. W. Nicholson.
The Proprietor. The Proprietor.
Dr. Henry Holland. Sir Wm. Blizard.
Mr. A. Tillock. William Marsden, Esq.
Mr. W. Nicholson. The Society of Arts.
The Proprietor. Capt. M. Craig.
Sir Wm. Blizard. Dr. Alex. Ramsay.
Mr. R. Baldwin. Mr. A. Tillock.
Mr. W. Nicholson. Mr. A. Tillock.
The Proprietor. The Master and Fellows of Trinity College, Dublin.
Mr. W. Nicholson. Dr. John C. Lettsom.
The Proprietor. Mr. John Sowerby.
INDEX

to the

PHILOSOPHICAL TRANSACTIONS

FOR THE YEAR 1812.

A

| ACID, fluoric, an account of some experiments on different combinations of | 352 |
| hydrophosphorous, singular properties of | 407 |
| ———— is a compound of pure phosphorous acid and water | 408 |
| ——— muriatic, its action on some combinations of chlorine and the metals | 202 |
| ——— additional experiments on | 242 |
| ——— oxymuriatic, additional experiments on | ib. |
| ——— phosphoric, composition of | 410 |
| ——— phosphorous, improperly described by chemical authors | 411 |
| ——— subsilicated fluoric, composition of | 356 |
| ———— effects of chemical agents on | 358, 359 |

Air, atmospheric, its influence on the compounds of the metals and chlorine curious, and worthy of attention | 192 |

Allen and Pepys, Messrs. Their experiments on respiration noticed | 379 |

Ammonia, fluat of; experiments on | 363, 364 |

——— composition of | 364 |

——— may be employed for etching on glass | 365 |

——— effects of chemical agents on | ib. |

——— subsilicated fluat of, its physical and chemical properties | 360, 361, 362 |

——— composition of | 361 |

Ameloposis, the effects of light on its tendrils | 315 |

Antimony, its combination with chlorine | 188 |

MDCCXCVII.
INDEX.

**Antimony**, protoxide of, its composition, .............................................. 197
**Antimonian**, the name given to a compound of antimony and chlorine, ............... 190
- composition of, ......................................................................................... 189, 190

**Apparatus**, description and mode of using one employed by Mr. Brodie in ascertaining the changes produced on air by the respiration of animals, ........................................................................... 380, 381
**Arsenic**, on its combinations with chlorine, ................................................. 186
- its effects on the animal system ...................................................................... 209
- does not produce its effects on the stomach, until it is carried into the blood, .... 210
- its effects on a rabbit, ...................................................................................... 211
- on a dog, ........................................................................................................... 212
- its action on the system less simple than that of the majority of vegetable poisons, 214

**Arsenicane**, the name given to a compound of arsenic and chlorine .................. 188
- properties and composition of, ...................................................................... 186, 188

**Atmosphere**, changes produced in it by the natural respiration of rabbits, .......... 383, 384
- changes produced in it by the artificial respiration of rabbits, ......................... 384, 388

**Atmosphere, cometic**, extent of, ...................................................................... 122
- bright envelope of, ........................................................................................ 128
- the disappearance of its transparent part, ......................................................... 128
- under the cover of the scattered light of the contracted envelope, ................. 129
- uncommon appearances in the dissolution of the envelope, ......................... 129

**Auk, little**, (Alca Alle) on the peculiar formation of its digestive organs .......... 397, 398

B

**Balana Mysticetus**, an account of some peculiarities in the structure of its organ of hearing, ................................................................. 83
**Barytes, muriate of**, its effects on the animal system, ....................................... 218
- on a rabbit, ...................................................................................................... 218, 220
- on a cat, .......................................................................................................... 218
- its principal action on the brain, it also acts on the heart, ................................. 219
**Barytes, muriate of**, it affects the stomach, but in a less degree than arsenic, .... 221
**INDEX.**

**Biot and Arago, MM.** Their investigations subsequent to those of MM. DELAMBRE and MECHAIN relative to the measurement of an arc of the meridian noticed, - 324

**Bismuth, its combination with chlorine,** - 190

**——— oxide of,** its composition, - 198

**Bismuthane, the name given to a combination of bismuth and chlorine,** - 190

**Bitter Spar,** on the primitive crystal of, - 161

**Black, Dr.** His theory of the source of animal heat objected to, - 391

**Blood,** chemical researches on, and some other animal fluids, 90

**——— serum of,** some remarks on its analysis, - 97

**——— coagulum of,** some experiments on it, - 100

**——— colouring matter of,** researches on it, - 102

**——— effects of acids on it,** - 104

**——— effects of alkalies on it,** - 107

**——— effects of different chemical agents on it,** - 108, 110

**——— its general chemical habits, &c.** prove it to be independent of iron, - 104, 106, 108, 112

**Brande, Wm. Thomas, Esq.** His chemical researches on the blood and some other animal fluids, - 90

**Brodie, B. C. Esq.** His further experiments and observations on the action of poisons on the animal system, - 205

**———** His further experiments and observations on the influence of the brain in the generation of animal heat, - 378

**C**

**Camera lucida,** application of periscopic principles in its construction, - 376, 377

**—— obscura, common,** a defect in its construction noticed, - 371

**———— periscopic,** in which the defect in the common camera is obviated, - 372

**———— causes of its superiority over the common camera explained,** - ib.

**Carbonic oxide and chlorine,** on a gaseous compound of, - 144

**———— physical properties of,** - 145

**———— chemical properties of,** - 145, 147

**Cassowary, (Casuarius Emeu),** on its solvent glands, - 399

**Chlorine,** an account of some experiments on its combinations with different metals, - 169
INDEX.

INDEX.

Crawford, Dr. His theory of the source of animal heat noticed, 391
Cufrane, the name given to a compound of chlorine and copper 170
—— properties of, 171
—— composition of, 172
Cufranea, the name given to a compound of chlorine and copper, 170
—— properties and composition of, 172, 173

D

Davy, John, Esq. On a gaseous compound of carbonic oxide and chlorine, 144
—— His account of some experiments on the combinations of different metals and chlorine, &c. 169
—— His account of some experiments on different combinations of fluoric acid, 352
Davy, Sir Humphry. On some combinations of phosphorus and sulphur, and on some other subjects of chemical inquiry, 405
Decandolle, M. His observation on the effects of light on the succulent shoots of trees and herbaceous plants noticed, 317
Delambre and Mecchain, M.M. Their investigations relative to a new measurement of an arc of the meridian noticed, 324
Delambre, M. His formulæ relative to the calculation of spheroids noticed, 338
Dupuytren, M. His experiments on respiration noticed, 389

F

Ferrane, the name given to a combination of chlorine and iron, 182
—— its composition, ib.
Ferranea, the name given to a combination of chlorine and iron, ib.
—— its composition, 183
Fluids, animal, chemical researches on some, 90
Fowl, common, (Phasianus Gallus), on its solvent glands, 398

G

Gas, fluoric acid, not to be obtained free from silex, as stated by some authors, 359
Gas, fluoboracic acid, advantageous mode of making it, with precautions to be observed, 365
—— specific gravity of, 366
### INDEX.

**Gas, fluoboracic acid,** quantity of it condensed by water greater, than of any other known gas, - 367

- absorbed by sulphuric acid, peculiarities of this compound, - 366, 367
- on its combinations with ammoniacal gas, 368
- their properties, peculiarities, and composition, - 369

- hydro-phosphoric, the name given to a peculiar gaseous compound of hydrogen and phosphorus, - 411
- its properties and composition, 408, 409, 411

- muriatic acid, additional experiments on, - 242

- the effects produced by its electrization with oxygen gas, - 245

- oxymuriatic acid, additional experiments on, - 242

- silicated fluoric, an advantageous mode of procuring it, 353
- specific gravity of, - 354
- composition of, - 355

- quantity of it decomposed by water, 357

**Gaseous compound,** on a peculiar one, obtained from hydrophosphorous acid, - 408

**Gay Lussac and Thenard, M. M.** Their researches on fluoric acid, &c. referred to, - 352, 353, 362, 365, &c.

**Glands, solvent,** on the different structures and situations of those in the digestive organs of birds, according to the nature of their food and particular modes of life, - 394

**Goose, (Anas Anser),** on its solvent glands, - 398

- Soland, (Pelecanus Bassanus), on its solvent glands, 395

### H

**Hatchett, Charles, Esq.** His chemical researches on the varieties of coagulated albumen, referred to, - 100

**Heat,** none generated in an animal in which the brain has ceased to perform its functions, - 388

- animal, facts proving that it is much influenced by the nervous system, - 378, 379, 390

**Hemisphere,** of the penetration of one, by an indefinite number of equal and similar cylinders, - 310

**Henry, Wm. M. D.** His additional experiments on the muriatic and oxymuriatic acids, - 242

**Heron, (Ardea Cinerea),** on its solvent glands, - 395

**Herschell, Wm. LL. D.** His observations of a comet, with remarks on the construction of its different parts, 115
INDEX.

Herschell, Wm. LL.D. His observations of a second comet, with remarks on its construction, 229.

Home, Everard, Esq. His account of some peculiarities in the structure of the organ of hearing in the Batæna Mysticus of Linnæus, 83.

His observations intended to shew that the progressive motion of snakes is partly performed by means of the ribs, 163.

On the different structures and situations of the solvent glands in the digestive organs of birds, according to the nature of their food and particular modes of life, 394.

Hunter, Mr. His description of the membrana tympani of the piked whale, quoted, 85.

I.

Iron, on its combinations with chlorine, 181.
— spar, on its primitive crystal, 161.

Ivory, James, Esq. On the grounds of the method which M. Laplace has given in the second chapter of the third book of his "Mécanique Céleste," for computing the attractions of spheroids of every description, 1.

His appendix to the preceding paper, containing a short account of a memoir of M. Lagrange's, with observations on the same, 34.

On the attractions of an extensive class of spheroids, 46.

K

Knight, Thomas, Esq. Of the attractions of such solids as are terminated by planes; and of solids of greatest attraction, 247.

Of the penetration of a hemisphere by an indefinite number of equal and similar cylinders, 310.

Knight, Thomas Andrew, Esq. On the motions of the tendrils of plants, 314.

L

Lagrange, M. A short account of his memoir, entitled "Éclaircissement d'une Difficulté singulière qui se rencontre dans le Calcul de l'Attraction des Sphéroïdes très peu différents de la Sphere," with observations on the same, 34.
INDEX.

Lambton, Major William. His measurement of an arc of the meridian in Bengal, noticed and examined, 340
Laplace, M. On the grounds of the method given in the second chapter of the third book of his "Mécanique Céleste," for computing the attractions of spheroids of every description 1
———- view of his methods of analysis employed in computing the attractions of spheroids in general, 5
Lead, on its combination with chlorine, 184
—— yellow oxide of, its composition, 196
Libavius, liquor of, a remarkable property it exhibits with oil of turpentine, 177
Light, its effects upon the tendrils of plants, 315
—— difference of its effects on certain vegetable substances, 317
Lime, carbonate of, on its primitive crystal, 159
Lymph, properties of, 96
——- analysis of, ib.

M.
Magnesia, muriat of, changes produced in it by the agency of heat under particular circumstances, 193
Manganese, on its combination with chlorine, 183
———- properties and composition of, 183, 184
Membrana Tympani, in the whale-bone whale, its description, 84
Meridian, observations on the measurement of three degrees of the, conducted in England by Lieut. Col. W. Mudge, 321
Metals, on the combination of some with chlorine, 169
—— on the relation between the proportion of oxygene and chlorine, with which some of them combine, 193
——- on the relation between the proportion of sulphur and chlorine, with which some of them combine, 198
Microscope, on a periscopic one, 370
——- on the advantages of one constructed on periscopic principles 375, 376

N.
Newton, Sir Isaac. The hypothesis he adopted relative to the figure of the earth noticed, 2, 322

O.
Organ of hearing, an account of some peculiarities in the structure of, in the Balæna Mysticetus of Linnaeus, 83
INDEX.

Ostrich, American, (Rhea Americana), its solvent glands fewer than in other birds, their structure, &c. 399
——— African, (Struthio Camelus), on its solvent glands, 400
——— — — on its gizzard, ib.

P.

Parrot, (Psittacus Æstivus), on its solvent glands, 399
Phosgene, or Phosgene gas, the name given to a gaseous compound of carbonic oxide and chlorine, 151
Phosphorus, of some combinations of, 406
——— — — on its combinations with chlorine, 406, 407
Pigeon, (Columba Domestica), on its solvent glands, 398
Planes, of the attraction of those bounded by right lines, 248
Plants, on the motions of their tendrils, 314
Plumbane, the name given to a compound of lead and chlorine, 185
——— — — its composition, ib.
Poisons, further experiments and observations on their action on the animal system, 205
——— — — mineral, conclusions respecting their agencies on the animal system, 226
Presents, list of those made to the Royal Society from November 1811 to June 1812, 417
Priestley, Dr. His experiments on fluor acid air noticed, 357, 358
Prism, of the attraction of an infinitely long one, whose base is any right lined figure whatever, 302
Prisms, of their attraction, 263
Problem, geometrical, one remarkable for generality and simplicity of result, 310
Pyramids, of their attraction, and generally, of any solids whatever that are bounded by planes, 257

R.

Rabbits, experiments on the changes produced in atmospheric air by their natural respiration, 383, 384
Rabbits, experiments on the changes produced in atmospheric air by their artificial respiration, 384, 388

S.

Sabrina, the name given to an island recently formed by a volcano, near St. Michael’s, 158
Snakes, observations intended to shew that their progressive motion is partly performed by means of the ribs 163

MDCCXCII.
INDEX.

_Solids_, on the attraction of such as are terminated by planes, and those of greatest attraction, 247
— on the attraction of any whatever, that are bounded by planes, 257
— of the attraction of some not terminated by planes 269
— of those of greatest attraction, 283

_Spheroids_, of every description. On the grounds of the method which _Laplace_ has given for computing the attractions of,

— on the attractions of an extensive class of, 46
— investigation of the attractions of a particular kind of, 69

_Stanname_, the name given to a compound of chlorine and tin, 177
— its properties and composition, 177, 179

_Stannamea_, the name given to a compound of chlorine and tin, 177
— its composition, 179

_Sublimate, corrosive_, its effects on the animal system, 222
— on a rabbit, 223
— on a cat, 224

_Sulphur_, of some combinations of, 412

_Svanberg, M._ His memoir relative to the measurement of an arc of the meridian in Lapland noticed, 325

_Swan, (Anas Cygnus)_ on its solvent glands, 398

_T._

_Tartar Emetic_, its effects on the animal system analogous to those of arsenic and muriate of barytes, 221

_Theorem_, a remarkable one proposed, relating to solids of greatestattraction, 301

_Tillard, S. Esq._ His narrative of the eruption of a volcano in the sea off the Island of St. Michael, 152

_Tin_, on its combinations with chlorine, &c. 176
— oxides of, their composition, 194
— submuriat of, its properties, 180

_Turkey (Meleagris Gallipavo)_ on its solvent glands, 399

_V._

_Vine_, the effects of light on its tendrils, 317

_Volcano_, a narrative of the eruption of one in the sea off the Island of St. Michael, 152

_W._

_Water_, its relation to the composition of many bodies worthy of being studied, 414
### INDEX.

*Water*, combines with bodies in definite proportions, and occasions changes in their properties, *ib.*

WOLLASTON, Wm. Hyde, M. D. on the primitive crystals of carbonate of lime, bitter spar, and iron spar, 159

--- on a periscope camera ob.

Scurra and microscope, 370

Woodpecker, (Picus Minor), on its solvent glands, 397

Woorara, experiments with it on a cat and a rabbit, 107, 208

### Z.

Zinc, on its combination with chlorine, 185

Zincane, the name given to a compound of zinc and chlorine, 186

--- or butter of zinc, its properties and composition, 185, 186

Zircone, its peculiar relation to water, 415
