AN INDEX
To the XXIII Volume of the Philosophical Transactions.
From Number 247, to Number 288, inclusive.

Bird, a curious one, of the Vulture kind, N. 285. p. 1409.
Bite of a Dog, see Dog.
Bloods circulation not discernable in Shrimps, N. 288.
p. 1498.
Bloods circulation in Water
1373.
Bone of a mans Thigh of a great size, N. 285. p. 1403.
Brain, a great part of it ulcerated, yet the senses remain
perfect, N. 277. p. 1069.
Cause of the motion of the dura mater, N. 287. p. 1480.
Books abbreviated or mentioned in this Volume.
Astronomiae Physicae & Geometricae Elementa, Auth. Dav.
Gregorio, N. 283. p. 1312.
Conflilium ætiologicum de ca-
fi quodam Epileptico. Auth.
1485.
Gazophylacium Naturæ & ar-
Bis Auth. Jac. Petiver, N.
Hippocratis Aphorismi, Auth.
1373.
Mechanical account of Poy-
p. 1320.
Physica vetus & nova; Auth.
Edm. Dickenfon, N. 277.
p. 1083.
Books of Plants, see Plants
C.
Amphore, how made, N.
278. p. 1096.
1069.
Cantharides, their inward use,
N. 280. p. 1210.
Celestial motions explained,
N. 283. p. 1314.
Ceylonese afraid of Drums, N.
277. p. 1053.
Cherry-stone with 124 Heads
1410.
Circulation of the Blood dis-
1184.
Chrifal observed, N. 277. p.
1072.
Corals and Submarine Plants,
N. 282. p. 1248. and N.
286. p. 1418.
Coins, see Antiquities.
Colleges and Students at Copen-
1400.
Chusan Island described, N.
Chinese Employments, N. 280.
p. 1207.
Chinese Cubit what, N. 280.
p. 1266.
Cn-
Cinnamon, which the best, N. 278. p. 1096.
Copper Ore, its figure, N. 277. p. 1072.
Curiosities near Leeds in Yorks
shire, N. 277. p. 1070.
Curiosities at Copenhagen, N. 285. p. 1400. see more in the Books.
D.

Damps, how Mischievous, N. 283. p. 1327.
Deer how catcht in Ceylon, N. 278. p. 1094.
Diseases, of their Division into Acute and Chronical, N. 287. p. 1490. see Fever, Epilepsy, Dropie, &c.
Dials of Linus at Leige decay'd, N. 286. p. 1418.
Dog Mad, an extraordinary case of his Bite, N. 277. p. 1075.
— Of that and the Tarantula, N. 283. p. 1322.
Drink and Urine, a passage for them mentioned N. 278. p. 1101.
Dumb and Deaf Person taught to Speak, N. 286. p. 1416.
Dura Mater, the cause of its motion, N. 287. p. 1480.
E.

Easty, only the Heart of a Tree, N. 277. p. 1059.
Egg, said to be laid by a Woman, N. 285. p. 1401.

Epileptick Fits, very Strange, N. 280. p. 1175.
F.

Ætus in utero, its Life, N. 281. p. 1237.
Fever Intermittent and Epilepsies their parallel, N. 287. p. 1486.
Fever malignant, an unusual one, N. 280. p. 1174.
Flower on the Stímina of Plants, its Description and Use, N. 287. p. 1474.
Fowl and Deer, how catcht in Ceylan, N. 278. p. 1094.
Fumes taken in by the Breath, good in many cases, N. 279. p. 1143.

G.

Generation, a hint as to its manner, N. 287. p. 1472.
Glands, how compos'd, N. 283. p. 1292.

Their true Fabrick as yet a Desideratum in Anatomy, N. 284. p. 1375.

Guts, Jejunum Broken in the Illias
Illiac Passion, N. 281. p. 1245.  
Guin of a Dog cut and cured, N. 283. p. 1299.  

H.  
Artes horned, N. 285.  
Heart and its motion describ'd, N. 281. p. 1218.  
Humours, their Concoction performed by the Viscera, N. 284. p. 1374.  

I.  
Inscriptions, Roman and other Antiquities, N. 278. p. 1129.  
Some Insects Monocular, N. 288. p. 1497.  
Insects and other Curiosities in the Gazophilacium, N. 285. p. 1413.  
Insects on other Insects, N. 288. p. 1501.  
Insects in the Water very small, carry their Spawn under the Tail, N. 288. p. 1497.  
—Of the Mariners Compass,  

English, N. 278. p. 1109.  
Iris of a Boys Eye with Letters in it, N. 286. p. 1418.  

K.  
Nise swallowed by a Pruss-an Boor confirmed, N. 285. p. 1408.  

L.  
Ens paluftiris, see Plants.  
Letters in the Iris of a Boys Eye, N. 286. p. 1418.  
Life of the foetus in utero, N. 281. p. 1235.  
Lungs of Sheep, their deject, N. 279. p. 1148.  
—Helped by fumes taken in by the breath, N. 279. p. 1143.  
Injected with Wax, and other observations on the Lungs, particularly of Frogs, &c. N. 285. p. 1389, &c.  
Lungs, an unusual Apostemation in them, cured, N. 285. p. 1278.  
Lyre of Ancient Greeks and Romans described, N.282. p.1267.  

M.  
Ad Dog, see Dog.  
Magnetic variations, and the Sea Compass, N. 278. p. 1104.  
Method of squaring some kinds of Curves, N. 278. p. 1113.  
Copper Ore its figure, N. 277. p. 1072.
Microscope improved, N. 281.
p. 1241.
Microscopical observations, see
Flowers of Plants and Insects.
Micrometer of a new invention,
N. 288. p. 1505.

N.

Nerves not perforated, N.
284. p. 1374.
Nutrition how performed, N.
287. p. 1487.

O.

O range seeds observed, and
wherein they differ from
others, N. 287. p. 1461.
Ore of Copper described, N. 277.
p. 1072.
—of Silver and Gold, N. 285.
p. 1402.
Oysters, observations on them,
N. 182. p. 1248.

P.

Arbelia of an unusual kind,
N. 278. p. 1127.
Perspiration, an hint relating
thereto, N. 286. p. 1435.
Wherein Perspiration differs from Sweating, &c.
N. 287. p. 1488.
Philosophy Mosaic and Corpuscularian vindicated, N. 277.
p. 1063.

Physick Garden at Amsterdam,
N. 286. p. 1417.
Plants, Brown's 6th, 7th and 8th
Books of East-India Plants, N.
N. 287. p. 1450.
Ebony only the heart of the Tree,
Cinnamon Plant, which the best,
N. 278. p. 1096.
Scrophularia aquatica, its virtues,
N. 278. p. 1104.
Tobacco, how planted, N. 279.
p. 1194.
Tea, three sorts of it, N. 280. p.
1205.
Root in China of wonderful Effect,
N. 280. p. 1208.
Sensitive Plant of a new kind, N.
Observations on Vegetation, N.
281. p. 1213.
Plants, a Tree shooting forth
Roots from the top, N. 282.
p. 1249.
A sort of Ficus Indica, N.
282. p. 1249.
Corals and other submersibles,
N. 286. p. 1419.
Plants from Chusan, N. 286.
p. 1421.
Orange and Limon Seeds
observed, with particulars therein, N. 287. p.
1461.
Of the Flower on the Stamina
of Plants, N. 287. p.
1474.
An Hypothesis of the im-
pregnation of Plant-seeds,
ibid.
Poysons, a Mechanical account of them, N. 283. p. 1320.
Printing, see Inventions.
Prune stones, one kill'd by swallowing them, N. 281. p. 1248.
N. 282. p. 1283.
Purgatives their Principles, N. 278. p. 1099.

Q

Quarris very large at Maestricht, N. 286. p. 1417.

R

Redum perforated by Prune stones swallowed, N. 281.
p. 1244.
Respiration, its Influence on the hearts motion, N. 281. p.
1217.

S

Sopenhagen a quatica, its great Virtues, N. 278. p. 1104.
Serpents in Ceylon, some not venomous, N. 278. p. 1095.
p. 1294.
Secrecion in Animals how made, N. 283. p. 1292.
Sheep how their Lungs are destructive, N. 279. p. 1148.

Silver and Gold dissolved in Aqua fortis, and Aqua Regis observed, N. 286. p. 1434.
Senses remain after the Ulceration of the Brain, N. 277. p. 1069.
Shortness of breath how relieved, N. 279. p. 1143.
Specificks, their use in Epilepsies, N. 287. p. 1486.
Spots observed in the Sun, N. 288. p. 1502.
Spouts at Sea, N. 277. p. 1077.
Spar in Flint, N. 277. p. 1071.
Stomach of a Fish with Plants like branchings, N. 277. p. 1070.
Stones, observations thereon, N. 277. p. 1072.
Stones of Plumbs and Prunes dangerous to swallow, N. 282. p. 1283.
Sublimate its nature, N. 283. p. 1324.
Sun, see Spots.
Sweating and Perspiration where in different, N. 287. p. 1488.

T

Angents to curve lines, &c. N. 284. p. 1331.
Tarantula, of its Bite, N. 283. p. 1322.
(1523)

Tastis, Observations on the Classis of them, N. 279. p. 1160.
Tea, three sorts of it, N. 280. p. 1205.
Tobacco, see Plants.
Trees, see Plants.

Urine, a new Passage for that and the Drink, N. 278. p. 1101.

Seeds of Oranges and Limes include a compleat Seed, N. 287. p. 1461.

Water, Observations of Animals therein, N. 279. p. 1152.
Weather, Observations for some years, N. 286. p. 1443.
Worms in human Bodies, N. 283. p. 1296.

FINIS.
ADVERTISEMENT.

There having been lately Proposed by Subscription Mr RAY's third and last Vol. of his HISTORY of PLANTS, whereby that whole Work is completed containing more Plants, and Description of new Species, than all the Books yet extant on that Subject; many hundreds being communicated from the Streights of Magellan, the Philippine Islands, and several Countries never searched of Plants before. By F. Georgio Camelli and other Virtuosi, who either reside, or have made careful remarks in the respective places; all disposed in an easy method, to be found by their Tribes and Characteristicks; with an account of such parts of them as are either Specifics for some Diseases, as the Peruvian Bark, &c. or are Universal Medicines, as Faba St Ignatii, &c. beside many peculiarities belonging to particular Plants, every where occurring in the Work. The same is already well advanced at the Press, as may be seen by the Sheets printed off at the Undertakers S A M. S M I T H and B E N J. W A L F O R D, Printers to the Royal Society, at the Prince's Arms in St Paul's Church-yard. Of whom Proposals may be had, and Printed Receipts given for the first payment.
