AN INDEX

To the Thirty first Volume of the Philosophical Transactions.

A.

Ir's Refraction allow'd for, n. 368, p. 169.
Appulses of the Planets to the fix'd Stars, n. 369, p. 209.
Artery Crural, ossify'd, n. 369, p. 226.

B.

Barometer Pendent, to measure the Height of Places by it, n. 366, p. 116. The Quicksilver seen at an extraordinary Height, n. 369, p. 222.

C.

Cap of Lead, To go out of the diving Bell with, at the Bottom of the Sea, n. 368, p. 177.
Colon, Part of it hanging out at a Wound in the Belly fourteen Years, n. 366, p. 89.
Cross Hairs in a Telescope, their Exactness in determining the right Ascension and Declination, n. 366, p. 113.

N n Diving-
INDEX.

D.
Diving-Bell improv'd, n. 368, p. 177;

E.

F.
Fasting, an incredible Instance of it, n. 364, p. 28.
Fœtus, continuing 46 Years in the Body, n. 367, p. 126.

G.
Glands Salivary described, n. 364, p. 5
Grapes, their Colour changed, n. 366, p. 102.
Guts, Part of the Colon hanging out at a Wound, n. 366, p. 126.

I.
Iffamine, its Colour changed, n. 366, p. 102.

L.
Leprosy. The Pox formerly call'd by that Name, n. 365, p. 55. n. 366, p. 108.
Ligament of the Patella broken, n. 365, p. 44.
Lymphaticks, their Course and Insertions, n. 364, p. 5.

M.
Maple-tree, Sugar made from its Juice, n. 364, p. 27.
Medicines, Their Operations, n. 365, p. 71.
   At Cambridge, n. 365, p. 65. At Cruys-Marebard, n. 368, p. 186.

Micro-
INDEX.

Mock-Sun, seen near London, n. 369, p. 211. The same in Northamptonshire, ibid, p. 212.

Moose-Deer described, n. 368, p. 165.

O.

Ossification of the Crural Artery observ’d, n. 369, p. 226. Oysters, the River Mene stock’d with them, ibid, p. 250.

P.

Plague at Constantinople, a Description of it, n. 364, p. 14.

Planets, their Places determin’d by their near Appulses to the fixed Stars, n. 369, p. 209.

Plants, a Method of discovering their Virtues by their external Structure, n. 364, p. 30. Observations upon their Generation, n. 369, p. 216.

Pox, its Antiquity in Europe, n. 365, p. 47. n. 366, p. 108.

Projectiles, some Propositions concerning their Motion, n. 367, p. 151.

R.

Rainbow seen on the Ground, n. 369, p. 229.

Refraction of the Air, what Allowance to be made for it, n. 368, p. 169. A Table for that purpose, ibid, p. 172.

S. Salt.
INDEX.

S.
Salt Alkalius from rotten Wood, n. 366, p. 122.
Ships, a new Method of rowing them, n. 369, p. 239.
Specific Gravity of solid Bodies. A Caution to be observ'd in trying it, n. 369, p. 223.
Spine Cloven, n. 366, p. 98.
Stars fix'd, the Infinity of their Sphere, n. 364, p. 22.
Their Number, Order, and Light, ibid. p. 24.
Sugar made from the Juice of the Maple-tree, n. 364, p. 27.
Sun's Parallax, n. 366, p. 114.
Surgery. Two extraordinary Cases, n. 365, p. 79.

T.
Telescope. Exactness of the Method of observing the Right Ascension and Declination, by cross Hairs in it, n. 366, p. 113.
Tumour in the Loins of an Infant attended with a cloven Spine, n. 366, p. 98.

V.
Variation of the Needle in the Baltic Sea, n. 366, p. 120. In the South Sea, n. 368, p. 173.

W.
Wood rotten producing Alcalious Salt, n. 366, p. 122.
Wood specifically heavier than Water, n. 369, p. 225.

FINIS.

LONDON:
Printed for W. and J. Innys, Printers to the Royal Society; at the West-End of St. Paul's-Church-Turd.
