INDEX

To the Thirty first Volume of the Philosophical Transactions.

A.

Ir's Refraction allowed for, n. 368, p. 169.

Appulses of the Planets to the fix'd Stars, n. 369, p. 209.

Artery Crural, offlif'd, n. 369, p. 226.

B.

Barometer Pendent, to measure the Height of Places by it, n. 366, p. 116. The Quicksilver seen at an extraordinary Height, n. 369, p. 222.

C.

Cap of Lead, To go out of the diving Bell with, at the Bottom of the Sea, n. 368, p. 177.

Colon, Part of it hanging out at a Wound in the Belly fourteen Years, n. 366, p. 89.

Cross Hairs in a Telescope, their Exactness in determining the right Ascension and Declination, n. 366, p. 113.
INDEX.

D.
Diving-Bell improv'd, n. 368, p. 177.

E.

F.
Fasting, an incredible Instance of it, n. 364, p. 28.
Fætus, continuing 16 Years in the Body, n. 367, p. 126.

G.
Glands: Salivary described, n. 364, p. 5.
Grapes, their Colour changed, n. 366, p. 102.
Guts, Part of the Colon hanging out at a Wound, n. 366, p. 126.

H.
Jasmine, its Colour changed, n. 366, p. 102.

I.
Leprosy. The Pox formerly call'd by that Name, n. 365, p. 55. n. 366, p. 108.
Ligament of the Patella broken, n. 365, p. 44.
Lymphatics, their Course and Infections, n. 364, p. 5.

M.
Magisterial Needle, its Variation in the Baltic, n. 366, p. 120. In the South Sea, n. 368, p. 173.
Maple-tree, Sugar made from its Juice, n. 364, p. 27.
Medicines, Their Operations, n. 365, p. 71.

Micro-

O.

Ossification of the Crural Artery observ'd, n. 369, p. 226. Oysters, the River Mene stocked with them, ibid. p. 250.

P.

Plague at Constantinople, a Description of it, n. 364, p. 14.

Planets, their Places determin'd by their near Apulses to the fixed Stars, n. 369, p. 209.

Plants, a Method of discovering their Virtues by their external Structure, n. 364, p. 30. Observations upon their Generation, n. 369, p. 216.

Pox, its Antiquity in Europe, n. 365, p. 47. n. 366, p. 108.

Projectiles, some Propositions concerning their Motion, n. 367, p. 151.

R.

Rainbow seen on the Ground, n. 369, p. 229.

Refraction of the Air, what Allowance to be made for it, n. 368, p. 169. A Table for that purpose, ibid. p. 172.
Salt Alkalious from rotten Wood, n. 366, p. 122.
Ships, a new Method of rowing them, n. 369, p. 239.
Sirius, his Parallax mistaken by Mr. Cuff, n. 364. p. 1.
Specific Gravity of Solid Bodies. A Caution to be ob-
served in trying it, n. 369, p. 223.
Spine Cloven, n. 366. p. 98.
Stars fix'd, the Infinity of their Sphere, n. 364, p. 22.
Their Number, Order, and Light, ibid. p. 24.
Sugar made from the Juice of the Maple-tree, n. 364,
p. 27.
Sun's Parallax, n. 366, p. 114.
Surgery. Two extraordinary Cases, n. 365, p. 79.

T.
Telescope. Exactness of the Method of observing the
Right Ascension and Declination, by cross Hairs in
it, n. 366. p. 113.
Tumour in the Loins of an Infant attended with a clo-
ven Spine, n. 366, p. 98.

V.
Variation of the Needle in the Baltic Sea, n. 366,
p. 120. In the South Sea, n. 368. p. 173.
Venereal Disease. Its Antiquity, n. 365, p. 47. n. 366,
p. 108.

W.
Wood specifically heavier than Water, n. 369, p. 225.

FINIS.
