AN INDEX TO THE Forty-second VOLUME OF THE Philosophical Transactions.

For the YEARS 1742, and 1743.

N. B. In n. 467, the Pages are to be alter'd with a Pen, p. i. answers to p. 281, and so on to p. xviii. which must be made p. 298.

A.

Abada, the Rhinoceros of Bontius, n. 470, p. 526.
Abio, Meteorolog. Obs. there, n. 466, p. 243.
Æschynomene, a sort of sensible Plant, n. 462, p. 6.
Air, Method of changing it in the Holds of Ships, n. 462, p. 42.
— foul and stinking, a Method to extract it out of Ships, n. 463, p. 62.
— its Resilience to swift and slow Motions, n. 469, p. 437.
Allemand, (M. ——) of the Polypus Insect, n. 466, p. 219.
Altars; the most autentick, n. 471, p. 584.
Ambe of Hippocrates, improved by M. l'Cat, n. 469, p. 387, 391.
— Mr. Freke's Improvement of it, n. 470, p. 556.
Anatomico-practica Obs. 2. D. Basteri, n. 466, p. 277.
Aneurisma falsum non pulsans, crucem continens, n. 466, p. 275.

Animal—
INDEX.

Animalcules found in Mushrooms, n. 471, p. 597.
Anonymous Letter, from Cambridge, concerning the Poly-
plan, n. 466, p. 227.
Antidote to the Indian Poison, in the West Indies, n. 462, p. 2.
Aquatic Animal, a strange, n. 469, p. 419.
Arateorum Syntagma citat. n. 466, p. 222.
Aristotle, Obs. that Wasp and Scolopendre live when cut
asunder, n. 466, p. 230.
Ascites cured by Tapping, n. 471, p. 628.
Asphaltis, Experiments upon the Water of, n. 462, p. 48.
Austin (St.) Obs. that the Scolopendra lives after being cut
into many Pieces, n. 466, p. 231.

B.

Baker (Henry) of a strange aquatic Animal, n. 469, p. 416.
———— of the Girl who speaks without a Tongue,
n. 464, p. 143.
———— of a Polype dried, and the Manner of dry-
ing it, n. 471, p. 616.
Barley, stone Pillars, n. 471, p. 583.
n. 463, p. 58. ib. 60. n. 464, p. 138.
Banjer, M. D. (Henry) of an extraordinary Hemorrhage,
and of an Ascites cured by Tapping, n. 471, p. 628.
Barbadoes, a Zoophyton there, like a Marigold-flower, n.
471, p. 591.
Barometrorum altitudinum differentiae, n. 464, p. 115.
Bases of the Cells, wherein Bees deposite their Honey, n.
471, p. 565.
277.
Bees; of the Bases of the Cells, wherein they deposite
their Honey, n. 471, p. 565.
Beighton (Henry) Meteorological Obs. at Coventry, n. 466,
p. 243.
Bell (Geo.) Account of Will. Payne’s Case, n. 462, p. 54.
Bellows, Hessian, improved, n. 463, p. 65.

Bentinck.
INDEX.

Bentinck (Honourable Charles) of the Polypus Insect, n. 466, p. 219, n. 467, p. 282.
Bethel, a Stone Pillar, n. 471, p. 583.
Bevan (Sylvanus) of the Bones of a Woman growing soft and flexible, n. 470, p. 488.
Beurer (Job. Ambrosius) de Succino, n. 468, p. 322.
Births and Burials at Bridgnorth; a Table of, n. 464, p. 133.
Boddington (Benjamin) of the Girl, who speaks without a Tongue, n. 464, p. 143.
Bones of a Woman growing soft and flexible, n. 470, p. 488.
——— or Stones in the Head of Fish, n. 462, p. 29.
Bonnet, M. D. (Charles) of a Water-worm, which, being cut in Pieces, becomes so many perfect Worms, n. 467, p. 295.
——— new Obs. upon Insects, n. 470, p. 458.
Bridgnorth, a Topographical Account of, n. 464, p. 127.
Broman (Mr. ——) Obs. Meteorolog. at Hudicksvall, n. 466, p. 243.
Buffon (M. ——de) of the Polypus Insect, n. 466, p. 219.
Burgess M. D. (Isaiab) Antidote to the West Indian Poison, n. 462, p. 2.

C.

Calculus praegrandis à Muliere cum Urina excretus, n. 468, p. 363.
Calf, Sea; or Phoca, n. 469, p. 383.
Cambridge, a Letter from thence, concerning the Polypus, n. 466, p. 227.
Campbell, of Kernan, (Rev. Rob.) of a Man who lived 18 Years on Water, n. 466, p. 240.
Cancers, internal; two Histories of; n. 464, p. 99.
Canterbury, Diary of the Weather there, 1734, n. 466, p. 244.

Carolina,
INDEX.

Carolina, South; Statical Experiments, and Meteorological Obs. there, n. 470, p. 491.

Cartilages, of the Structure, and Diseases of Articulating, n. 470, p. 514.

Cæsillioneus (fobl.) de Polynomio, n. 464, p. 91.

Account of his Traité des Sens, n. 466, p. 264.

a Machine for dressing Patients, who have any Ailment on the Back, or Os Sacrum, n. 468, p. 364.

Caterpillars, new Obs. on them, by M. Bonnier, n. 470, p. 458.

Catharine’s Island (Saint) near Brasil, Obs. Eclipse of the Moon, Dec. 21. 1740, n. 462, p. 18.

Cells; of the Bases of them, wherein Bees deposite their Honey, n. 471, p. 565.

Champignous, of their Seeds, n. 471, p. 595.

Charge, how much Powder is kindled in the Explosion of one, n. 465, p. 172.

Child of a monstrous large Size at Rouan, n. 471, p. 627.

— a Lufius Natura in one, n. 464, p. 152.

Cold, the Effects of it in Hudson’s Bay, n. 465, p. 157.

Collins (Bartkolomew) his Café, n. 464, p. 99.

Column, its Position in the antient Sphere, n. 466, p. 221.

Committee of the Royal Society, to examine some Questions in Gunnery, n. 465, p. 172.

Cooke (Benj.) of the Fire-ball seen Dec. 11. 1741, n. 462, p. 25.

Corke (Robert Lord Bishop of) of an antient Temple in Ireland,
I N D E X.

Corn, Smutty; Worms Obs. in it, n. 471, p. 63.

Cornes (Rev. Mr. Rich.) Account of Bridgnorth, n. 464, p. 127.

Corromendel near Mount Sinai, hot Spring there, n. 462, p. 52.

Coventry Meteorolog. Obs. there, n. 466, p. 243.

Coxe articuli suppuration, cum secessione capitis femoris, n. 466, p. 274.

Cradle, an hanging; by M. le Cat, n. 468, p. 364.

Crooked Children, a Swing for them, n. 462, p. 20.

Cutting (Margaret) who speaks, though she had lost her Tongue, n. 464, p. 143. her Letter, ib. p. 150.

Cyrillus M. D. ( ) Meteorolog. Obs. at Naples, n. 466, p. 244.

D.

Daniells (Gabriel) of a Girl, who speaks without a Tongue, n. 464, p. 149.

Darlington Meteorol. Obs. there, n. 466, p. 244.

Dead-Sea, Analysis of its Waters, n. 462, p. 48.

Dennis (John) of the Girl, who speaks without a Tongue, n. 464, p. 149.

——— his Improvement of the Hessian Bellows, n. 463, p. 65.

Diocorides, an Obs. on Poisons, n. 462, p. 7.

Dod, M. D. (Pierce) of bloody Urine in the Small-pox, n. 470, p. 559.

Doppelmayer (Joh. Gabriel) Diaries of the Weather, n. 466, p. 245.

Douglas, M. D. (James) publish'd the first true Figure of a Rhinoceros, n. 470, p. 527.

Dropsy, an extraordinary Cafe of a, n. 466, p. 223.

Durer (Albert) his Figure of the Rhinoceros false, n. 470, p. 524.

Eames,
INDEX.

E.

Earthven Ware, a Gold-colour'd Glazing for, n. 465, p. 188.

Earthquakes felt at Leghorn, Jan. 16.—27. 1742, n. 463, p. 77.

— from 1727 to 1741 in New England, n. 462, p. 33.

Eclipses Lunæ, Jan. 2 1741, Obl. Pekini, n. 468, p. 309.

Edinburgh, Diaries of the Weather there, n. 466, p. 245.

—- the Pox there, 1497, n. 469, p. 420.

Eels in Vinegar, Obl. on the Mouths of them, n. 469, p. 416.

Egedins (Hans) the natural History of Greenland, n. 471, p. 607.

Electricity, Obl. by Dr. Desaguliers, n. 462, p. 14.

—- Conjectures concerning it, n. 464, p. 140.

Electrics per se, n. 462, p. 14.

Ethiopic Stones used as Knives, n. 471, p. 587.

Eschequer, the Standard Weights and Measures examin'd, n. 470, p. 544, 551.

F.

Farina of the Red Lily, Microscop. Obl. on it, n. 471, p. 63.

Du Faye (Mr.) two Sorts of Electricity, n. 464, p. 140.

Feeling, concerning it, n. 466, p. 264.

Femoris Capitis Secessio per Suppurationem Coxxæ, n. 466, p. 274.

Ferguison (John) lived 18 Years on Water, n. 466, p. 240.

Fish, a Method of preparing Specimens, by drying their Skins, n. 463, p. 57.

—- an Effay towards their natural History, by M. Klein, n. 462, p. 27.

—- Bones, or Stones in their Heads, ib. p. 29.

P p p p 2

Fish,
INDEX.

Fiffo, their Hearing, n. 462, p. 28.
Flaccorum nivalium Figuræ, n. 464, p. 114.
Fluxions, an Account of Mr. Mac Laurin’s Book, n. 468, p. 325. n. 469, p. 403.
Folkes, Esq; (Martin) Account of the Proportions of the English and French Measures and Weights, n. 465, p. 185.
——— of the Polyphus Insect, n. 466, p. 219.
——— Account of the Fresh-water Polyphus, n. 469, p. 422.
Formica-Leo, Obs. on it, by M. Bonnet, n. 470, p. 463.
Forth, Esq; (Henry) Obs. of the Weather, n. 466, p. 244.
Founders-Hall, the Standard Weights examin’d, n. 470, p. 541.
Fréke, (John) an Instrument for reducing a dislocated Shoulder, n. 470, p. 556.
Fremond Calmad (Cla.) of Earthquakes at Leghorn, Jan. 1742, n. 463, p. 77.
Fresh-water Polyphus, several Papers of it, n. 467, p. 281.
——— n. 469, p. 422.

G.

Gardiner (Mr.) his Case, Stones in Bags in the Bladder, n. 462, p. 11.
——— of a Child of a monstrous large Size, n. 471, p. 627.
Geyn (Jacob. de) Aratea, citat. n. 466, p. 222.
Girard de Villars (M. —) of cutting Star-fish, and their Radii growing again, n. 467, p. 296.
Glazing, a Gold-colour’d for Earthen Ware, n. 465, p. 188.

Gomda,
INDEX.

Gomda, a Rhinoceros in the Indian, n. 470, p. 525.
Gordon (Capt. Will.) an Account of the Fire-ball seen Dec. 11. 1741, n. 463, p. 58.
Grandgar, i. e. the Pox in Edinburgh 1497, n. 469, p. 421.
Greenland; its Natural History by Hans Egedius, ib.
Gronovius, M. D. (John Frid.) of preparing Specimens of Fish, by drying their Skins, n. 463, p. 57.

——— of a Water Insect [the Polypus], which, being cut into several Pieces, becomes so many perfect Animals, n. 466, p. 218.
Grubs, Vine; Obs. on them by M. Bonnet, n. 470, p. 465.
Guettard (M. ——) of cutting Star-fish, and the Radii growing, n. 467, p. 295.
Guildhall, the Standard Weights and Measures examin’d, n. 470, p. 548.
Gunnery, new Principles of; by B. R. n. 469, p. 437.
——— Questions in; proposed by Dr. Jurin, n. 465, p. 172.
Gun-powder; its Force, n. 469, p. 437.

H.

Hadley (Geo.) Abstract of Meteorolog. Obs. from 1731 to 1735, n. 466, p. 243.
Hemorrhage; of a remarkable one frequently returning, n. 471, p. 628.
Hales, D. D. (Stephen) his Ventilators or Ship’s Lungs, n. 463, p. 65.
Hamman Pharaon Water, Analysis of it, n. 462, p. 52.
Hammock, M. le Cat’s, for dreeing Patients, who have Ailments on the Back or Os Sacrum, n. 468, p. 364.

Hammond,
INDEX.

Hammond, (Will.) of the Girl, who speaks without a
Tongue, n. 464, p. 146.
Hard-Soap, how to make it for medicinal Uses, n. 463,
p. 71.
Hatchet, Stone one; of the antient Iris, n. 471, p. 589.
—— Amazonian; Sagaris, ib.
Hearing, concerning it, n. 466, p. 266.
—— of Fishes, n. 462, p. 28.
Heinrichs (Godofridus) a Gold-colour’d Glazing for Earthen
Ware, n. 465, p. 188.
———————— de Disparitio Annuli Saturni, Ann. 1743,
1744, n. 471, p. 602.
Hellebore, White; its bad Effects, n. 468, p. 378.
Helvetiae Stirpium indigenarum Enumeratio, n. 468, p. 369.
Herba Sensitiva, its Root an Antidote to the West Indian
Hippocrates, his Ambe improved, n. 469, p. 387, 388.
Hobson (Jos.) of the wonderful Increase of the Seeds of
Plants, n. 468, p. 320.
Holkam in Norfolk, a Meteor seen there, Aug. 1741, n. 465,
p. 183.
Holland and Westfriseland, the Quantity of People, n. 468,
p. 315.
Hollmannus (Samuel Christiaanus) de Differentiis Altitudinum
Barometrorum, n. 464, p. 115.
Hondius (Hendrick) his Figure of the Rhinoceros false,
n. 470, p. 526.
Horns of the Rhinoceros described and figured, n. 470,
p. 537, 540.
———————— some are double, ib. p. 537.
Hudicksoel, Meteorolog. Obs. there, n. 466, p. 243.
Hudson’s Bay, Obs. of Cold, Variation, Longitude and
Hughes (Rev. Griffith) of a Zoophyton like a Marigold
Flower, n. 471, p. 590.
Huile de Cheaux, n. 463, p. 76.
Hunter, (Will.) of the Structure and Diseases of articulating
Cartilages, n. 470, p. 514.

Huxham,
INDEX.

Huxham, M. D. (John) of Polypi taken out of the Hearts of several Sailors, just come from the West-Indies, n. 464, p. 123.
Hydrocephalo, Obs. de singulari, n. 466, p. 278.

I.
Jewels, the polishing them practised before Moses's Time, n. 471, p. 588.
Indian Poison, an Antidote to it, n. 462, p. 2.
Infus: Obs. de; qui Sacrum Aqua plenum, ab Ossæ Sacro usque ad Talos propendem, habuit, n. 466, p. 277.
Infus, a Water, that being cut into Pieces, becomes so many Animals. See Polypus, ib. p. 218.
— new Obs. on them by M. Bonnet, n. 470, p. 458.
— which are multiplied by Cuttings or Slips, ib. p. 468.
Instrument, Sir J. Newton's, for Obs. the Moon and fixt Stars at Sea, n. 465, p. 155.
Jurin M. D. (James) his Questions in Gunnery, n. 465, p. 172.
Juifett, M. D. (Bernard de) of cutting Star-fish, and their Radii growing again, n. 467, p. 295.

K.
Kent, a Diary of the Weather there, n. 466, p. 243.
Kesbecon (Will.) Extract of his second and third Treatise of the Quantity of People in Holland, &c. of the Lives of Widows, and Duration of Marriages, n. 468, p. 315.
Klein (Fac. Theod.) Hist. natur. Piscium promovendæ Missus I. n. 462, p. 27.
Knives, sharpen, (Jost. v. 2, 3.) i. e. Knives of sharp Stones, n. 471, p. 587.

L.
Lapilli in Cranis Piscium, n. 462, p. 29.

Lapis
INDEX.

Lapis infernalis, a Sort of; n. 463, p. 72.
Latham, M. D. (Rev. Ebenezer) of the Position of the
Colure in the antient Sphere, n. 466, p. 221.
Latitude, Obs. in Hudson’s Bay, n. 465, p. 157, 169.
Laurin. See Mac Laurin.
Leeuwenhoeck (M. ——) of the Polypus Insect, n. 466, p. 220:
Legge (Honourable Edward) Obs. of an Eclipse of the
Leghorn, Earthquakes felt there, Jan. 16.—27. 1742,
n. 463, p. 77.
Le Prutts M. D. (Antonius) de Calculo praecordi à Muliere
cum Urina excreto, n. 468, p. 363.
Lienis Abscessus per Vulvam fascia Puris Excretiones anatus,
n. 466, p. 273.
Lilly, Red; Microscop. Obs. on its Farina, n. 471, p. 63.
Lime, Oil of, n. 463, p. 76.
Lining, M. D. (John) Statical Experiments, and Meteor-
ological Obs. in S. Carolina, n. 470, p. 491.
Longitude, Obs. in Hudson’s Bay, n. 465, p. 157, 169.
Lord (Rev. Mr. Tho.) of Worms, whole Parts live, when
cut asunder, n. 470, p. 522.
Lovell (Tho. Lord) of a Meteor seen near Holkam, Aug.
1741, n. 465, p. 183.
Luna obexit stellam in VIII, Feb. 22. 1741, Pekini, n. 468,
p. 312.

Lunæ Eclipsis, Jan. 2. 1741, Pekini, Obs. n. 468, p. 309.
Luxations of the Arm with the Shoulder, how reduced,
n. 469, p. 395.

M.
Macky (Mr. ——) of the Pox in Edinburgh, 1497, n. 469,
p. 420.
Mac Laurin (Colin) of the Bases of the Cells, wherein Bees
deposite their Honey, n. 471, p. 565.
INDEX.

Mac Laurin, an Account of his Treatise of Fluxions, n. 468, p. 325. n. 469, p. 403.
Magnetic Needle, Obs. of its Declination in Hudson's Bay, n. 465, p. 157.
Mallow, the Upright, of the wonderful Increase of its Seeds, n. 468, p. 320.
Malm, a Sort of Osseocolla, n. 471, p. 634.
Marriages, a Calculation of their Duration, n. 468, p. 315.
Masen (Christopher) of a Fire-bull seen, and great Explosion heard, Dec. 11, 1741, n. 462, p. 1.
Matsebab, Hebrew Pillars of Stone, n. 471, p. 585.
Mead, M. D. (Richard) an Obs. on Poisons, n. 462, p. 7.
Measures and Weights, the Standards at the Exchequer, Guildhall, Founders-hall, and the Tower, compared, n. 470, p. 541.

the Proportions of the English and French, n. 465, p. 185.
Medical Cases, two remarkable, n. 471, p. 628.
Mediolurgi, Obs. Roris decidui & Fig. Floccorum nivalium, n. 464, p. 114.
Melon-seeds 42 Years old, n. 464, p. 115.
Mercury Transit over the Sun, Obs. 31. 1736, n. 471, p. 622.

Meteorologiac Ephemerides Romanæ, 1741, n. 466, p. 193.
Meteorological Obs. for 1731, 1732, 1733, 1734, and 1735, n. 466, p. 243.
in S. Carolina, n. 490, p. 491.
Methodus Plantarum D. Halleri, n. 468, p. 381.
Micheli, M. D. (——) of the Seeds of Mushrooms, n. 471, p. 599.
INDEX

Microscopical Obs. on the Farina of the Red Lily, and of Worms in smutty Corn, n. 471, p. 639.

Middleton (Capt. Christoph.) the Effects of Cold; Obs. of the Longitude, Latitude, and Declination of the Magnetic Needle in Hudson's Bay, n. 465, p. 157.

Miller (Joseph) a Catalogue of 50 Plants for the Year 1740, n. 471, p. 620.

Milward, M. D. (Edward) of an Antidote to the Indian Poison in the W. Indies, n. 462, p. 2.

Mimosa arboreascens Americana, &c. flore albo, n. 462, p. 6.

Mock-Suns. See Parhelia.

Moon and fixt Stars, an Instrument to observe their Distances at Sea, n. 465, p. 155.

Morf, Tunuli sepulchrales, there, n. 464, p. 134.

Moffyn, Bart. (Sir Tho.) of a golden Torques, n. 462, p. 24.

Mushrooms; of their Seeds, by Mr. Pickering, n. 471, p. 593. By Mr. Watson, ib. p. 599.

———— Animalculés of the Maggot, or Fly-kind, found in them, ib. 597.

N.

Naples, Meteorolog. Obs. there, n. 466, p. 244.

Needham (Turbervil) concerning Malm, and some Microscopical Obs. on the Farina of the Red Lily, and of Worms discovered in smutty Corn, n. 471, p. 634.

Needle, Magnetic, its Declinations, Obs. in Hudson's Bay, n. 465, p. 157.

New-
INDEX.

Newton (Sir Isaac) an Instrument for obs. the Moon’s Distance from the fixt Stars at Sea, n. 465, p. 155.

Nvis Figure, n. 464, p. 114.

Norimberg, Diaries of the Weather there, n. 466, p. 246.

Nourse, (Edward) of Stones found in Bags in the Bladder, n. 462, p. 11.

O.

Oak-trees struck with Lightning in a Spiral, n. 464, p. 137

Obelisks in Egypt, their Origin, n. 471, p. 587.

Oil of Lime, n. 463, p. 76.

Osteocolla, a Sort called Malm, n. 471, p. 634.

P.

Pack, M. D. (Chrsstoph.) Diary of the Weather for 1734, n. 466, p. 244.

Padua, Meteorolog. Obs. there, n. 466, p. 245.

Parsons, M. D. (James) Account of M. le Cat’s Tr. ité des Sens, n. 466, p. 264.

Natural History of the Phoca, Vitalis marinus, or Sea-Calf, n. 469, p. 383.

of the Rhinoceros, n. 470, p. 523.

Payne, (Wm.) Stones in his Kidneys and Bladder, n. 462, p. 54.

Pendula, num aliqia centrifuga perturbantur? n. 468, p. 299.

INDEX.

Pheca, or Sea-Calf, n. 469, p. 383.
Pillars of Stone, their antient Use, called Mætebah, n. 471, p. 583.
Plantarum Methodus D. Halkri, n. 468, p. 381.
Pluritis suppurata per Vulvam Puelle excreta, n. 466, p. 273.
Poison, West-Indian, an Antidote to it, n. 462, p. 2.
Polenus (Johannes Marchio) usu Pendula vid aliquâ centri-fuga perturbentur? n. 468, p. 299.
