THE Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions, take this opportunity to acquaint the public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations, which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume. And this information was thought the more necessary, not only as it has been the common opinion, that they were published by the authority, and under the direction, of the Society itself; but also, because several authors, both at home and abroad, have in their writings called them the Transactions of the Royal Society. Whereas in truth the Society, as a body, never did interest themselves any further in their publication, than by occasionally recommending the revival of them to some of their secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought adviseable, that a Committee of their Members should be appointed to reconsider the papers read before them, and select out of them such, as they should
ADVERTISEMENT.

should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance or singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of nature or art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons, through whose hands they receive them, are to be considered in no other light, than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be paid with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.

p. 105.

XIX. Observations on the Eclipse of the Sun, April 1, 1764: In a Letter to the Rev. Thomas Birch, D. D. Secret. R. S. from James Ferguson, F. R. S.

p. 108.

XX. Observations on the Eclipse of the Sun, April 1, 1764, at Brompton-Park: By Mr. Samuel Dunn.

p. 114.

p. 119.

XXIII. A Catalogue of the Fifty Plants from Chelsea Garden, presented to the Royal Society by the worshipful Company of Apothecaries, for the Year 1763, pursuant to the Direction of Sir Hans Sloane, Baronet, Med. Reg. et Soc. Reg. aliquando Praeses: By
CONTENTS.

XXIV. Observations on the Eclipse of the Sun, April 1, 1764: In a Letter to the Right Honourable James Earl of Morton, Prof. R. S. from the Reverend Nathanael Bliss, M. A. Savilian Professor of Mathematics at Oxford, and Astronomer Royal. p. 141.

XXVI. Observations on the Eclipse of the Sun, April 1, 1764: By Matthew Raper, Esq; F. R. S. p. 150.

XXVII. A Table of the Places of the Comet of 1764 discovered at the Observatory of the Marine at Paris, the 3d of January, about 8 O'Clock in the Evening, in the Constellation of the Dragon, concluded from its Situation observed with regard to the Stars: By Monsieur Charles Messier, Astronomer at the Depot of the Plans of the Marine of France, at Paris. p. 151.

XXXI
CONTENTS.

XXXI. Observations on the Eclipse of the Sun at Chatham, April 1, 1764, by Mr. Mungo Murray: Communicated to Joseph Salvador, Esq; F. R. S. in a Letter from Dr. John Bevis. p. 171.

XXXII. Observations and Experiments on different Extracts of Hemlock: By Michael Morris, M. D. F. R. S. p. 172.

XXXV. Some New Properties in Conic Sections, discovered by Edward Waring, M. A. Lucasian Professor of the Mathematicks in the University of Cambridge, and F. R. S. to Charles Morton, M. D. Sec. R. S. p. 193.

XXXVI. An Account of the Effects of Lightening at South Weald, in Essex: By W. Heberden, M. D. and F. R. S. p. 198.

XL. Observations upon the Effects of Lightening, with an Account of the Apparatus proposed to prevent its Mischiefs to Buildings, more particularly to Powder Magazines; being Answers to certain Questions proposed by M. Calandrini, of Geneva, to William Watfon, M. D. F. R. S. p. 201.

XLI. An Account of the Effects of Lightening in St. Bride’s Church, Fleet-street, on the 18th of June 1764: In a Letter to Mr. Benjamin Wilson, F. R. S.
CONTENTS.

F. R. S. from Edward Delaval, Esq; F. R. S. p. 227.

XLII. A Letter from Thomas Lawrence, M. D. to William Heberden, M. D. and F. R. S. concerning the Effects of Lightning, in Essex-street, on the 18th of June 1764. p. 235.

XLIII. An Account of what appeared on Opening the Body of an asthmatic Person: By W. Watson, M. D. F. R. S. p. 239.

XLV. Solis Defectus observatus in Collegio Romano a Patribus Societatis Jesu die prima Aprilis Anno MDCCCLXIV. Tempore post medium nocem. p. 254.

XLVI. The Description of a New Hygrometer, invented by James Ferguson, F. R. S. p. 259.

XLVIII. Concise Rules for computing the Effects of Refraction and Parallax in varying the Apparent Distance of the Moon from the Sun or Star; also an easy Rule of Approximation for computing the Distance of the Moon from a Star, the Longitudes and Latitudes of both being given, with Demonstrations of the same: By the Rev. Nevil Maskelyne, A. M. Fellow of Trinity College, in the University of Cambridge, and F. R. S. p. 263.

XLIX. Extract of a Letter from Mr. John Winthrop, Professor of Mathematicks in Cambridge, New England, to James Short, A. M. F. R. S. p. 277.

L. Observation
CONTENTS.

L. Observation of the Transit of Venus, June 6, 1764, at St. John's, Newfoundland: By John Winthrop, Professor of Mathematicks and Philosophy at Cambridge, New England. p. 279.

LIV. Extract of a Letter from Mr. John Horsey Fourth Mate on board the Glatton East-India Ship, to the Rev. Mr. Nevil Maskeleyne, F.R.S. dated Batavia, Nov. 16, 1763, giving an Account of his Observations, at Sea, for finding out the Longitude by the Moon. p. 329.

LVI. Some
CONTENTS.

LVIII. An Account of an extraordinary Disease among the Indians, in the Islands of Nantucket and Martha’s Vineyard, in New England. In a Letter from Andrew Oliver, Esq; Secretary of his Majesty’s Province of Massachusett’s Bay, to Israel Mauduit, Esq; F. R. S. p. 386.

LIX. Astronomical Observations made at the Island of Barbadoes; at Willoughby Fort; and at the Observatory on Constitution Hill, both adjoining to Bridge Town. By Nevil Maskelyne, A. M. Fellow of Trinity College, Cambridge, and F. R. S. p. 389.
