VOL. LX. For the Year 1770.

LONDON:
Printed for LOCKYER DAVIS,
Printer to the ROYAL SOCIETY,
in Holborn.

M.DCC.LXXI.
ADVERTISEMENT.

The Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations, which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume. And this information was thought the more necessary, not only as it has been the common opinion, that they were published by the authority, and under the direction, of the Society itself; but also, because several authors, both at home and abroad, have in their writings called them the Transactions of the Royal Society. Whereas in truth the Society, as a body, never did interest themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought adviseable, that a Committee of their Members should be appointed to reconsider the papers read before them, and select out of them such, as they
ADVERTISEMENT.

should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March 1752. And the grounds of their choice are, and will continue to be, the importance or singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
CONTENTS

TO

VOL. LX.

I. An Account of a Journey to Mount Etna, in a Letter from the Honourable William Hamilton, His Majesty's Envoy Extraordinary at Naples, to Mathew Maty, M. D. Sec. R. S. p. 1

II. A Letter from Philip Carteret, Esquire, Captain of the Swallow Sloop, to Mathew Maty, M. D. Sec. R. S. on the Inhabitants of the Coast of Patagonia. p. 20

III. A Letter on a Camelopardalis found about the Cape of Good Hope, from Capt. Carteret to Mathew Maty, M. D. Sec. R. S. p. 27

IV. Experiments in Support of the Uses ascribed to Ganglions of the Nerves, in Philosophical Transactions, Vol. LIV. and Vol. LVII. by James Johnstone, M. D. p. 30

V. An Account of a new Species of the Manis, or Scaly Lizard, extracted from the German Relations of
vi CONTENTS.

of the Danish Royal Missionaries in the East Indies, of the Year 1765, published at Hall, in Saxony, by Dr. Hampe, F. R. S. p. 36

VI. An Account of the Result of some Attempts made to ascertain the Temperature of the Sea in great Depths, near the Coasts of Lapland and Norway; as also some Anecdotes, collected in the former: By Charles Douglas, Esquire, F. R. S. then Captain of his Majesty's Ship the Emerald, Anno 1769. p. 39

VIII. Account of a very remarkable young Musician. In a Letter from the Honourable Daines Barrington, F. R. S. to Mathew Maty, M. D. Sec. R. S. p. 54

IX. A Determination of the exact Moments of Time when the Planet Venus was at external and internal Contact with the Sun's Limb, in the Transits of June 6th, 1761, and June 3d, 1769. By Samuel Dunn. p. 65

X. An Account of some Improvements made in a new Wheel Barometer, invented by Keane Fitz Gerald, Esquire, F. R. S. In a Letter to Charles Morton, M. D. Sec. R. S. p. 74

XI. Some Observations upon an inedited Greek Coin of Philistis, Queen of Syracuse, Malta, and Gozo, who has been passed over in Silence by all the ancient Writers. In a Letter to Mathew Maty, M. D. Sec. R. S. from the Rev. John Swinton. B. D. F. R. S. Custos Archivorum of the University of Oxford, Member of the Academy degli Apatiti at Florence,
CONTENTS.

Florence, and of the Etruscan Academy of Cortona in Tuscany. p. 86

XII. A Letter from Mr. Thomas Woolcomb, Surgeon, to the late Doctor Huxham, F. R. S. on the Case of a Boy, who died of a Gun-shot Wound, and communicated by the Rev. J. Cor. Huxham, M. D. F. R. S. p. 94

XIII. Journal of a Voyage, made by Order of the Royal Society, to Churchill River, on the North West Coast of Hudson's Bay; of thirteen Months Residence in that Country; and of the Voyage back to England; in the Years 1768 and 1769: By William Wales. p. 100

XIV. Observations on the State of the Air, Winds, Weather, &c. made at Prince of Wales's Fort, on the North West Coast of Hudson's Bay, in the Years 1768 and 1769: By Joseph Dymond and William Wales. p. 137

XV. An Account of some very perfect and uncommon Specimens of Spongiae from the Coast of Italy: in a Letter to James Weft, Esquire, President of the Royal Society; from John Strange, Esquire, F. R. S. p. 179

XVI. A Letter from Captain Davies to John Ellis, Esquire, F. R. S. on a Method of preparing Birds for Preservation. p. 184

XVII. A Letter to Dr. Benjamin Franklin, F. R. S. giving an Account of the Appearance of Lightning on a Conductor fixed from the Summit of the Main-mast of a Ship, down to the Water: By Capt. J. L. Winn. p. 188

XVIII. An Investigation of the lateral Explosion, and of the Electricity communicated to the electrical Circuit,
CONTENTS.

Circuit, in a Discharge: By Joseph Priestley, LL.D. F.R.S. p. 192

XIX. Experiments and Observations on Charcoal: By the Same. p. 211

XX. Meteorological Observations for 1769, made at Bridgewater in Somersetshire: Communicated by Dr. Jeremiah Milles, Dean of Exeter and F. R. S. p. 228

XXI. Meteorological Observations at Ludgvan in Mount's Bay, Cornwall, 1769: By William Borlase, D. D. F. R. S. Communicated by the Same. p. 230

XXII. A Letter to Dr. William Watson, F. R. S. giving some Account of the Manna Tree, and of the Tarantula: By Dominico Cirillo, M. D. Professor of Natural History at the University of Naples. p. 233

XXIII. Observations made at Dinapoor, June 4, 1769, on the Planet Venus, when passing over the Sun's Disk, with three different Quadrants, and a two Foot reflecting Telescope: Communicated to the Royal Society, by the Court of Directors of the East India Company. p. 239

XXIV. Directions for making a Machine for finding the Roots of Equations universally, with the Manner of using it: By the Rev. Mr. Rowning, to John Bevis, M. D. F. R. S. p. 240

* XXIII. On the late Transit of Venus: By Nathan. Pigott, Esquire, to Dr. Bevis, F. R. S. p. 257

* XXIV. Observations on the proper Method of calculating the Values of Reversions depending on Survivorships: By Richard Price, D. D. F. R. S. p. 268

XXV. De

XXXIV. Further Remarks on the Properties of the Coagulated Lymph; on the Stopping of Hæmorrhages, and on the Effects of Cold upon the Blood: By the Same. p. 398

XXXV. Account of some Bones found in the Rock of Gibraltar, in a Letter from John Boddington, Esq; to Dr. William Hunter, F. R. S. with some Remarks from Dr. Hunter, in a Letter to Dr. Matthew Maty, M. D. Sec. R. S. p. 414

XXXIV. Difficulties in the Newtonian Theory of Light, considered and removed: By the Rev. S. Horstey, L. L. B. F. R. S. p. 417

XXXVI. Some new Theorems for computing the Areas of certain Curve Lines: By Mr. John Landen, F. R. S. p. 441

XXXVII. Extract of two Letters from the late Capt. Alexander Role, of the 52d Regiment, to Dr. Mu'doch, F. R. S. p. 444

XXXVIII. Extract of a Letter from Mr. John Latham, Surgeon and Midwife, at Dartford in Kent, to Mr. Warner, Fellow of the Royal Society, and Senior Surgeon to Guy's Hospital, Communicated to the Royal Society by Mr. Warner. p. 451

XXXIX. Astronomical Observations made at Cavan, near Strabane, in the County of Donegal, Ireland, by Appointment of the Royal Society: By Mr. Charles Mason. p. 454

XL. A Letter from M. Pingré, of the Royal Academy of Sciences at Paris, to the Rev. Mr. Maskelyne, Astronomer Royal, F. R. S. p. 497

XLI. Observations of Immerisons and Emerisons of Jupiter's first Satellite, made at Funchal, in Madeira, with a reflecting Telescope of 18 Inches Focus, made
CONTENTS

made by Mr. Short: By the late Thomas Heberden, M. D. F. R. S. p. 502

XLII. Account of the Transit of Mercury, observed at Norriton, in Pennsylvania Nov. 9, 1769, agreeable to an Appointment of the American Philosophical Society, held at Philadelphia, for promoting useful Knowledge: By William Smith, D. D. Provost of the College of Philadelphia; John Lukens, Esq; Surveyor General of the Province of Pennsylvania; David Rittenhouse, A. M. and Mr. Owen Biddle. Communicated by Benjamin Franklin, LL. D. F. R. S. and President of the Philosophical Society at Philadelphia. p. 504

XLIII. A Letter to James Weft, Esq; President of the Royal Society, containing the Investigations of twenty Cases of Compound Interest: By J. Robertson, Lib. R. S. p. 508

XLIV. A Copy of a Letter from John Ellis, Esq; F. R. S. to Dr. Linnaeus, F. R. S. &c. with the Figure and Characters of that elegant American Evergreen-tree, called by the Gardeners, the Lob-lolly Bay, taken from Blossoms blown near London, and shewing that it is not an Hibiscus, as Mr. Millar calls it; nor an Hypericum, as Dr. Linnaeus supposes it, but an intire new Genus, to which Mr. Ellis gives the Name of Gordonia. p. 518

XLV. The Copy of a Letter from John Ellis, Esq; F. R. S. to Mr. William Aiton, Gardener to her Royal Highness the Princes Dowager of Wales, at Kew, on a new Species of Illicium Linnaei, or Starry Aniseed Tree, lately discovered in West Florida. p. 524

XLVI. A
CONTENTS.

XLVI. An Account of a very remarkable Meteor seen at Oxford. In a Letter to Mathew Maty, M. D. Sec. R. S. from the Reverend John Swinton, B. D. F. R. S. Custos Archivorum of the University of Oxford, Member of the Academy degli Apatiffi at Florence, and of the Etruscan Academy of Cortona in Tuscany. p. 532

XLIX. A short Account of the Observations of the late Transit of Venus, made in California, by Order of his Catholic Majesty; communicated by his Excellency Prince Masserano, Ambassadour from the Spanish Court, and F. R. S. p. 549

L. Extract of a Letter, dated Paris, Dec. 17, 1770, to Mr. Magalhaens from Mr. Bourriot, containing a short Account of the late Abbé Chappe's Observation of the Transit of Venus in California. Translated by Dr. Bevis, F. R. S. p. 551
