PRESENTS
MADE TO THE
ROYAL SOCIETY
In the YEAR 1773;
WITH
The NAMES of the DONORS.

Donors' Names. Presents made.
Omitted, 1772.
Mar. 5. Mr. John Belchier, F. R. S. Presented a miniature bust, in ivory, by Marishall, of the late J. Flamsteed, Astronomer Royal, F. R. S. to be preserved in the Observatory at Greenwich, by order of the Council of the Royal Society, as Visitors.

Board of Longitude. Nautical Almanack for 1774.
Mr. J. Robertson, Lib. The Geographical and Historical Grammar of Salmon, amended and improved, 12th Edit.

Donors
1772: Donors names.  Presents made.

Nov. 12. M. J. Bernoulli.  Recueil pour les Astronomes, Tom. II. 8°

Mr. Charles White.  A Treatise of the Management of pregnant and lying-in Women. 8°

Monf. Caffini.  Voyage pour éprouver les Montres Marines de Mr. Le Roy. 4°

Philip Stephens, Esq; F. Divers Specimens of Birds, &c. from Falkland’s Isles.

Hudfon’s Bay Committee.  Divers Specimens of Quadrupeds, Birds, Fishes, and other Curiosities, from Hudfon’s Bay.

19. Humphrey Jackson, Esq; F. R. S.  Various Specimens of Ingulfs made from the produce of the British Fisheries.

Dec. 10. Board of Longitude.  Tables for correcting the apparent distance of the Moon and Stars from the Effects of Refraction and Parallax. 4°

Richard Price, D. D. Observations on Reversionary Payments. 8°

Mr. J. Robertson, Lib. Elements of Navigation, 3d Edit. 2 vols. 8°

Mr. Daniel Marshall.  Two Specimens of Painting on Glasses.

24. Owen Salusbury Brecton, Esq; F. R. S.  Specimen of the Lagetta Tree, and its lace-like Bark, from Jamaica.

1773.

Jan. 14. Mr. Leonard Euler, F. R. S. Theoria Motuum Lunae; cum Tab. Afrom. Lunar. 4°

Mr. J. J. Blaffiere.  Hist. Nat. de la Reine des Abeilles, from the German of Mr. Schirach. 8°

Mr. J. R. Forster, F. R. S. Travels through Italy, Greece, and Egypt, by the Baron Reidefel. 8°

21. John Lauder, Esq; Specimen of a Rock with Corallines, &c. upon it, in a Glass Case; through the Hands of Dr. Fothergill.

5. Donors
1773. Donors Names. Presents made.

Feb. 18. Thomas Percival, M. D. Effays Medical and Experimental, 2d Vol. 8°

Mr. J. Miller. Botanical Prints, coloured, N° 5. fol.

Mar. 4. J. Stedman, M. D. A critical Inquiry into the Constitution of the Roman Legion, 4°

Mr. James Hill. Cafes in Surgery, of Cancers, &c. with Observations. 8°

11. Hon. Daines Barrington, King Alfred's Anglo-Saxon Version of Orosius. 8°

18. R. Acad. Stockholm. Their Transactions, 4 Numbers, from July 1771 to July 1772. 8°

Prof. Car. Linnaeus, F. Mantissa Plantarum altera Generum, R. S. Edit. 6, 1772. 8°

25. Hon. Daines Barrington. Specimens of three birds and one Fish, V. P. R. S.

Sir J. Pringle, Bart. P. R. S. Several Specimens of the Fish Pholas, alive, in a Piece of a Rock.

Monf. Quefnay. Recherches Philosophiques. 8°

22. Antiquary Society. R. S. The Question concerning Literary Property determined. 4°

Sir James Burrow, V. P. Histoire et Memoires pour 1769. 4°

29. Mr. J. A. De Luc, F. R. S. Recherches sur les Modifications de l’atmosphere, 2 vol. 4°

Mr. Rouelle.

May 6. Mr. John Ives.

13. Prof. Titius. The Hist. and Antiq. of Yarmouth in Norfolk, by Hen. Swinden. 4°

Abbe Rozier. Phil. Trans. for the Years 1751, 53, 54, 55, 56, 57, 58, 59, and 60, 5 vol. Wittemberg. 4°

27. Author. Elemens du Systeme general du Monde. 12°
1773.

Donors Names.

Presents made.

June 10. Don Anton d'Ulloa, F. Noticias Americanas. 4°

R. S.

Dr. Alexander Johnson. A Collection of Cases of Recoveries from Drowning, &c. 8°

17. M. de la Lande, F. R. S. Reflections sur les Cometes qui peuvent s'approcher de la Terre. 8°

June 17. Mr. James Ferguson, F. Select Mechanical Exercises. 8°

R. S.

July 1. Patrick Brydone, Esq; A Tour through Italy and Malta, 2 vols.

Mr. J. R. Forster, F. R. S. Several Birds, and other Animals, from the Cape of Good Hope.

John Walsh, Esq; F. R. S. A Male and a Female Torpedo, preserved in two large Glass Jars of Spirits.
AN INDEX TO THE
Sixty-Third VOLUME
OF THE
Philosophical Transactions.

A.

ACIDS, vegetable, better adapted to the operation of
fining liquors than the mineral, p. 13. Their power
of dissolving the red particles of the blood, p. 318.

Aeolias. See Sea-Anemones.

Acus marina squamosa, a fish stranger to our seas, but
found in a fossil state, p. 171, 172.

Air, set on fire, and producing a terrible explosion in a
coal-pit, p. 218.

Alchorne, Mr. Stanesby, his catalogue of the fifty Chelsea
plants for 1771.

America, Indians of, their ancient government, p. 142.
Their present form, p. 144, 145. Believe in witchcraft,
p. 146. Their language.
INDEX.

American Lakes, in the same latitude with the Caspian Sea, p. 4. Produce fish fit for making isinglass, p. 5.

Anglesea, population of that island, from 1590 to our time, p. 181. Considerably increased, p. 182, &c. Probable causes of this increase, p. 180.

Arburus, variation of its place, taken notice of by former astronomers, p. 94, 95. Ascertained by Mr. Horniby, p. 103, &c. Thought the nearest star to our system, p. 105. How to be employed in ascertaining the obliquity of the ecliptic, p. 106, &c.

Aristotle, whether he was acquainted with the Lagopus? p. 224.

Astronomical Observations. By Mr. Wollaston, p. 67.

Atmosphere, degrees of its humidity at different heights, p. 440.

B.

Bailly, Mr. on new methods of improving the theory of Jupiter's satellites, p. 185. Is author of a work on that planet, p. 186. His contrivances to measure the diameters of the satellites, and make the observations of their eclipses comparable, p. 188. Some notes on his paper by Dr. Horsey, p. 213, &c.

Ball, of fire, seen bursting in a parlour, by two gentlemen who were struck and stunned by it, p. 234, 235. Seen by other people, p. 239.

Barker, Mr. Thomas, his meteorological register, for 1772, p. 222, &c.

Belts, in Jupiter, their appearances, p. 73, &c.

Beluga, the fish, from which most of the isinglass is made in Russia, p. 7.

Bergius, Mr. Peter Jonas, Description of a rare American plant, of the Brownææ kind, p. 173, &c.
INDEX.

Bernard, Mr. on an explosion of air, in a coal-mine, in Yorkshire, p. 217.

Bird-catcher, could prognosticate when a Nightingale was coming into song, p. 276.

Birds, on the singing of, p. 249. Their first sound is called Chirp, ibid. The next, Call, p. 250. Their first attempt to sing is to record, ibid. When perfect, are said to sing their song round, p. 251. Their notes are no more innate than language in man, p. 252. Wild, do not sing above ten weeks in a year, p. 261. Sing all in the same key, p. 267. Notes observed in several species, p. 268. Have no delicacy of sensations, p. 271. Several that were taught to speak anciently, p. 272. How far they imitate, p. 276. Their comparative merits in singing reduced to a scale, p. 282. How they first came to have particular notes, p. 287.

Black Colour, in what proportion it grows hotter by the rays of the sun, p. 41.

Botany, brought back to England by the Saxons, p. 80. Traced there from the twelfth century, p. 81. Cultivated by Gerrard, before the end of the sixteenth, p. 82. And by John Tradescant, ibid.

Browneæ, a genus of American plants, exhibited by Mr. Bergius, p. 174, 175. A rare species of it, called Mountain-rose, more particularly described, p. 175, 176.

Vol. LXIII. The British
British Museum, how secured from lightning, p. 64.
Brydone, Patrick, Esq. on a fiery meteor, and some new electrical experiments, p. 163.
Buffon, M. de, his observations on the Lagopus corrected p. 224. His opinion concerning the πεδίος of Aristotle considered, p. 274, 275.
Bulfinches, a musical composition made for two, p. 271.
Burbot, common, called Marthy, at Hudson’s-Bay, p. 152.

C.

Call, of a bird, what it means, p. 250.
Canary Birds, singing chiefly either the tit-lark or the nightingale notes, p. 261.
Castration, does not improve the voice, p. 278.
Cavendish, Hon. Henry, his new experiment on electricity, p. 475.
Caviar, made from a species of Sturgeon, p. 151.
Charcoal. See Electrical.
Chelsea Plants, for 1771, p. 30.
Chirp, the first found emitted by birds, p. 249.
Circulation. See Sap.
Cod and Ling, very proper for making of Isinglass, p. 13.
Committee, report from the, on powder magazines at Purfleet, p. 42. Recommend an iron bar tapering to a sharp point, and raised ten feet above the building, p. 45. Persuade in their opinion, p. 66.
Conic Sections, considered two different ways, p. 341. Their properties derived from their description, by Mr. Jones, p. 343, &c.
Cuckoos, their natural notes, p. 269.
De Luc, Mr. account of his new hygrometer, p. 404.
Author of a work on the modifications of the atmosphere, p. 439.

Denarius, Samnite, of the Veturian family, formerly described by Mr. Swinton, p. 22. Farther considered by him, p. 23.

Detonation, by the application of salt of copper upon tin-foil, p. 137.

Dew, its phenomena accounted for, p. 454.

Dicquemare, Abbé, on Sea Anemones, p. 361.

Dissolution, of water in air, supposed analogous to that of menstrua, p. 458. Whether really so, p. 459.

Douglas, Sylvester, Esq. on Tokay and Hungarian wines, p. 292.

Ducarel, Dr. on the early cultivation of Botany in England, p. 79. On the Life of John Tradescant, p. 83, &c.

Dunmore Park. See Cavern.

E.

Eddystone Lighthouse, secured from lightning, by a metallic conductor, p. 58.

Ecliptic, its obliquity judged to be constant, from the observations of Arcturus by some astronomers, p. 106, 107. Appreciated to diminish, from Mr. Hornsby’s observations, p. 109, &c. In what proportion, p. 121, &c.

Electrical experiments on charcoal, by Mr. Kinnerley, p. 38. Made by Mr. Brydone upon a cat, p. 167, 168. And with the hairs of the head of a young Lady, p. 169.

Electrical machine, improved, p. 333. Will work equally in all kinds of weather, p. 339.
Electric organs of the torpedo described, by Mr. Hunter, p. 482. Abounding with nerves, p. 486.

Evaporation, is greater in summer than in winter, p. 457.

Explosion. See Air.

---

Fiery. See Meteor.

Fining, what is called so by the brewers, p. 5.

Fosler, Mr. J. R. on some curious fishes from Hudson's Bay, p. 149.

Fossil, from Hampshire, described and figured, p. 171.

Thought to be the exuviae of the fish, called, Acus maxima squamosa, ibid. Or of a beaver's tail, p. 172.

Franklin, Dr. Benjamin, his opinion on pointed bars, to preserve buildings from lightning, p. 52. Has proved that lightning and electricity are the same fluid, p. 55.

---

Globules. See Blood.

Glue, very different from Isinglass, p. 4, 5.

Goldfinch, who had the notes of a wren, p. 256.

Gould, Mr. his account of the state of the conductors in St. Paul's cathedral after lightning, p. 59.

Gwiniad, called Tickomeg, at Hudson's-Bay, p. 154.

---

Hair, human, proper to receive electricity, p. 169. Which is the most fo? p. 170.

Hales, Dr. Stephen, declared himself against the circulation of the sap in plants, p. 126.

Hewson, Mr. William, on the red particles of the blood, p. 303. His experiments to ascertain their Figures
p. 309. Has discovered the use of the lymphatic glands, the thymus, and the spleen, p. 323.

Higgins, Dr. B. on actual fire, and detonation produced by the contact of tin-foil, with nitrous salt of copper, p. 137.

Hornsby, Professor Thomas, on the motion of Arcturus, and diminution of the obliquity of the ecliptic, p. 93, &c.

Hudson's, Bay, fishes sent from thence to the Royal Society, p. 150, &c.

Humor, definition of that word by Mr. De Luc, p. 407. Different, at different heights, p. 440. How it diffuses itself, p. 451. The warmer it is, the more it separates the parts of bodies, p. 457.

Hungarian wines, their different species, p. 300.

Hunter, Mr. John, anatomical observations on the torpedo, p. 481.

Jackson, Humphrey, Esq. on the manner of making the Isinglass, p. 1, &c. Went to Russia to discover the art, p. 4.

Icthyocolla. See Isinglass.

Igneous fluid, its influence on the dilatation of bodies, by humidity, p. 459.

Johnston, Sir William, on the Northern Indians of America, p. 142, &c.

Jones, William, Esq. his deduction of the properties of the conic sections, p. 340.

Iron, the danger of placing considerable quantities of it near chimneys, p. 231, &c.

Ivory, a substance proper to make a hygrometer, p. 410. More dilated with warm water, p. 457.

Jupiter, the planer, its appearances with that of the satellitises, represented by Mr. Wollaston, p. 75, &c. See Satellitises.

King, Edward, Esq; his communication of papers relating to some singular effects of lightning, p. 231. Observations on a sparre incrustation, p. 241.

Kilkenny, a cave near it described, p. 16.

Kimmersey, Mr. Ebenezer, on electrical experiments with charcoal, p. 38.

Kirkshaw, Rev. Samuel, his letter on a person killed in bed by lightning, p. 177, 178.

Kle, or Kla, the name of issinglass in Siberia, p. 7.

Lagopus, whether known to Aristotle, p. 224. Whether torpid in winter, p. 225.
La Torre, Father, his globular microscopes, p. 305. Thought the particles of the blood perforated, p. 310. Mistaken in this, p. 312, 313.

Lead, native, found in Monmouthshire, p. 20. Properer than iron for the under-ground parts of conductors, p. 45.

Leuwenhoek, his opinion about the red particles of the blood considered, p. 303—314.

Linnet, the cock easily distinguished from the hen, when very young, p. 253. Imitates the song of another bird, p. 254. One of them taught to articulate some words, p. 256, 277.

Luvian, a family in Campania, recorded upon a Samnite denarius, p. 27.

Marles found in Saffordshire, and analysed, p. 161.

Meddix, or Merrix, the chief magistrate of the Oscans and Samnites, p. 25.

Meteor, fiery, observed by Mr. Brydone, near Berwick bridge, p. 164. Its distance and elevation estimated, p. 165, 166. Supposed to have some relation with an electrical state of the air, p. 167.

Meteorological observations for 1772, at Lyndon in Rutlandshire, p. 222, &c.

Mocking bird, its merit as to singing, p. 285.
INDEX.

Morris, Dr. Michael, his account of a specimen of native lead, p. 20, 21.

Mountain rose, a species of the Brownea plants described by Mr. Bergius, p. 175, 176.

Mushel, Mr. his observations on vegetation, p. 126, &c.

N.

Naples, how the houses are there ornamented, p. 326, 327.

Nerves, probably subservient to the electrical powers of the torpedo, p. 487.

Nightingales, have the muscles of the larynx stronger than other birds of the same size, p. 262. May be heard at half a mile, p. 279. Their superiority in point of singing ascertained, p. 281, &c.

Nooth, Dr. on improvements in the electrical machine, p. 333.

O.

Obliquity. See Ecliptic.

Oceans and Samnites. See Meddix.

P.

Petals, being cut, secure fructification, p. 130, 131.

Points, recommended by the committee, for the bars raised at the top of the magazines at Purfleet, p. 45. Disapproved by Mr. Wilson, p. 48. Further opposed by him, p. 50.

Population. See Anglesey.

Powder magazines at Purfleet, p. 42, 43. How to be preserved from lightning, p. 45, 46.

Ptarmigan.
INDEX.

Ptarmigan. See Lagopus.

Purjicet. See Powder Magazines.

R.

Record, to, in birds, is an attempt to sing, p. 250.

Reproductions. See Sea Anemones.

Robertson, Mr. John, his introduction to a paper of the late Mr. Jones, on conic sections, p. 341.

Robin, educated under a nightingale, p. 257. And under other birds, p. 258.

Rose. See Mountain.

S.

Sacbeem, or chief Magistrate, of the Indians of America, p. 144, 145.

Sals, their comparative effects upon the red particles of the blood, p. 317.

Sennite. See Denarius, Meddix.

Sap, new experiments, which prove, that it does not circulate in plants, p. 127, &c.

Satellites, of Jupiter, means of improving their theory, p. 185. Reasons of the uncertainty in the observations of their eclipses, p. 186, 187. How to be remedied, p. 188, &c.

Sesum, its power in preserving the red particles of the blood, p. 317.

Singing. See Birds.

Vol. LXIII.
INDEX.

Sky-lark, our mocking bird, p. 286.
Solar rays, produce a greater evaporation than dark heat, p. 452.
Song of birds, why so difficultly capable of musical notation, p. 265. The first origin of our musical notes, p. 269. Inferior to that of the human voice, p. 288.
Sounds, what part they are in fish, p. 7, 8. The best for making of glass, p. 9.
Sparrow, whose song was a mixture of those of the linnet and goldfinch, p. 257, 277.
Staffordshire. See Marles.
St. Paul's cathedral, secured from lightning by metallic conductors, p. 58. Account of the effects of lightning upon them, p. 59, 60.
Sturgeon, from Hudson's-Bay, described, p. 150. Comes near the fish called Sevruga, by the Russians, p. 151.
Sturgeon, improper for making of glas, p. 13, 14.
Sucker, a fish from Hudson's-Bay, being a new species of carp, p. 155. Described by Mr. Forster, p. 158.
Swinden, Professor J. H. on the great colds at Franeker, and other Towns in Holland, p. 89, &c.
Swinton, Rev. John, farther remarks upon a Denarius of the Veturian family, p. 22.

Thunder-storm, its effects on Lord Tylney's house at Naples, p. 229.
Tin-foil, fire and detonation produced with it, in a solution of nitrous salt of copper, p. 137. How accounted for, p. 139, &c.
Torpedo, phenomena of its shock proved to be electrical, p. 462. Imitated by artificial electricity, p. 469. Their comparative force in water and in air, p. 471. Compared by Kempfer to lightning, p. 476. From wha
INDEX.

what organs derived, p. 472*, 473*. Differences from those of electricity accounted for, p. 475, 476*. Anatomically described by Mr. Hunter, p. 481.

Tradesman, Mr. John, a lover of Botany in England, p. 82. Particulars of his life, p. 83, &c. His monument at Lambeth, p. 86, 87.

V.

Vegetation. See Mustel.

Vengoline, an African singing bird, imitated by a young linnet, p. 254.

Vetustian family. See Denarius.

W.

Walker, Mr. Adam, gives an account of the cavern of Dunmore-Park, near Kilkenny, in Ireland, p. 16.

Walsh, John, Esq., on the electric property of the Torpedo, p. 461. His experiments on that subject at La Rochelle, p. 462. And the Isle of Rhé, p. 464, &c.

Watson, Professor Richard, on the rays of the sun falling upon the bulb of a thermometer painted black, p. 46.

Wilson, Mr. Benjamin, his dissent from the Purfleet committee, p. 18. His observations upon lightning, and the method of securing buildings, p. 49. His account of the conductors at St. Paul's cathedral after lightning, p. 60.

Withering, Dr. William, his experiments upon different kinds of marle found in Staffordshire, p. 161.

Wollaston, Rev. Francis, his astronomical observations, p. 67. Describes the suspension of the pendulum of his clock, p. 77.^

There are Twenty Copper-Plates in this Volume.

ERRATA.

P. 8. l. 6, for and r, before which.

P. 273, l. penult, for quam, r. quum.

The End of the Sixty-Third Volume.
BOOKS fold by Lockyer Davis, in Holborn.

1. The Young Sea-Officer's Assistant, both in his Examination and Voyage. In Four Parts. 1. The Substance of that Examination, which every Candidate for a Commission in the East India Service, or the Navy, must necessarily pass before his Appointment. 2. Directions for working a Ship in all difficult Cases. 3. Necessary Observations in making the Land, and sailing up the Channel. 4. General Instructions and Allowances from the Owners of East-India Ships to the several Commanders in that Service. To which is added, a short, easy, arithmetical Rule, for determining the Course and Distance. By John Adams, of Waltham-Abbey. 3s. 4d.

2. Sir Isaac Newton's Two Treatises of the Quadrature of Curves, and Analysis by Equations of an infinite Number of Terms explained. Containing the Treatises themselves, translated into English, with a large Commentary; in which the Demonstrations are supplied, where wanting; the Doctrine illustrated, and the Whole accommodated to the Capacities of Beginners. By John Stewart, A. M. Professor of Mathematics in the University of Aberdeen. 12s. 4d.

3. Postilla Hantoniensis collecta & in Museo Britannico deposita, a G. Brander; cum Figuris elegantissimis. 10s. 6d. 4d.

4. Leonardi Plutenui Opera Botanica, viz. Phytographia, Almagestum Botanicum, Mantissa, Alnathenum Botanicum, five Sarpian illustriorum & minus cognitorum libri: Tabulis atque CCCCLIV. lumina diligentia elaborate. 4 vols. 4d.

6. Dr. Birch's History of the Royal Society: Being a Supplement to the Philosophical Transactions. In which the most considerable of those Papers and curious Experiments, communicated to the Society, when the Philosophical Transactions were not regularly carried on, are inserted in their proper Order: Together with a short Account of the Lives of the most eminent Members subjoined. 4 vol. 4to. Price 1l. 1s. 6d. in Sheets.

7. Dr. Birch's Collection of the Yearly Bills of Mortality, from 1657, to 1758, inclusive. To which are subjoined, as a Specimen of the Use which may be made of them, 1. Natural and Political Observations on the Bills of Mortality, by Capt. John Graunt, F. R. S. 2. Sir William Petty's Essay on Political Arithmetic, concerning the Growth of the City of London; with the Measures, Periods, Causes, and Consequences thereof. 3. Observations on the past Growth and present State of the City of London, in 1757, by Cotton Morris, Esq.; F. R. S. 4. A Comparative View of the Diseases and Ages, and a Table of the Probabilities of Life, for Thirty Years, by James Hutton; Esq.; F. R. S. 4to. 10s. 6d.

8. Mr. Da Cotta's Natural History of Poultry. 12s. 6d. 4to.
The List of the Royal Society. MDCCLXXIV.

His Sacred Majesty King GEORGE III. Patron.
His Sacr. Majesty STANISLAUS AUGUSTUS, King of POLAND.
His Sacr. Majesty CHRISTIAN King of DENMARK.
His most Serene Highness CHARLES Margrave of BADEN DOURLACH.
His most Serene Highness FRANCIS Duke of MODENA.
His most Serene Highness PETER Duke of COURLAND.
His most Serene Highness CHARLES WILLIAM FERDINAND, Hereditary Prince of BRUNSWICK.

The Present Council.

Sir John PRINGLE, Bt. President.
Joseph Banks, Esq; [A.R. St. Soc. A.R.P. Cor.
Hon. Daines Barrington, V. P.
Ow. Salusbury Brereton, Esq; :
Richard Brocklesby, M. D.
Sir James Burrow, Knt. V.P.
Samuel Clarke, Esq;
Sir Henry Hoghton, Bart.

Samuel Horfley, LL. B. Sec.
Nevil Maskelyne, B.D. { Afr. Reg.
Israel Mauduit, Esq;
Hon. Constantine Phipps.
John Walsh, Esq; :
Samuel Wegg, Esq. Treaf. V. P.
Francis Wollaston, LL. B.

This Council is to be continued till SAINT ANDREW'S Day, 1774.
Robert Adam, Esq.; Nathan Alcock, M. D.
John Anderson, A. M.; Pr. G. U.
Thomas Anguish, Esq.; Arbuthnot, Esq.
Shuckburgh Aikin, Esq.; Aikin, M. D.
Sir Joseph Ayloffe, Bart.
Henry Baker, Esq.; Roger Baldwin, M. A.
Edward Bancroft, M. B.
Mr. David Bayford.
T. Butterworth Bayley, Esq.; Hon. Topham Beauclerk.
Mr. John Belchier.
Rich. H. Alex. Bennet, Esq.; John Bentinck, Esq.;
Hon. Count W. Bentinck.
John Bethune, D. D.
Charles Blagden, M. D.
Francis Blake, Esq.;
Richard Blyke, Esq.;
Benjamin Booth, Esq.;
