CONTENTS

OF

VOL. LXXXI. PART I.

I. A SECOND Paper on Hygrometry. By J. A. De Luc, Esq. F. R. S. Page 1

II. On the Production of Ambergris. A Communication from the Committee of Council appointed for the Consideration of all Matters relating to Trade and Foreign Plantations; with a prefatory Letter from William Fawcener, Esq. to Sir Joseph Banks, Bart. P. R. S. p. 43

IV. On Nebulous Stars, properly so called. By William Herschel, LL.D. F. R. S. p. 71

V. Abstract of a Register of the Barometer, Thermometer, and Rain, at Lyndon in Rutland; by Thomas Barker, Esq.; with the Rain in Hampshire and Surrey; for the Year 1789. Communicated by Thomas White, Esq. F. R. S. p. 89

VI. Observations on certain horny Excrences of the Human Body. By Everard Home, Esq. F. R. S. p. 95

VII. Con-
VII. Considerations on the Convenience of measuring an Arch of the Meridian, and of the Parallel of Longitude, having the Observatory of Geneva for their common Intersection. By Mark Augustus Pictet, Professor of Philosophy in the Academy of Geneva; in a Letter to Sir Joseph Banks, Bart. P. R. S. p. 106

APPENDIX.

Meteorological Journal kept at the Apartments of the Royal Society, by Order of the President and Council. p. i
ERRATA.

VOL. LXXX.

P. 598. l. 14. for 307366.8 read 303766.8
610. l. 20. for p. 224 read p. 244.

Also in Gen. Roy’s Table of General Results, p. 232, longitude of Wrotham Hill, for 19.12 read 18.48.
PHILOSOPHICAL
TRANSACTIONS,
OF THE
ROYAL SOCIETY
OF
LONDON.

VOL. LXXXI. For the Year 1791.

PART II.

LONDON,
SOLD BY PETER ELMSLY,
PRINTER TO THE ROYAL SOCIETY.
MDCCXCI.
VIII. On the Rate of Travelling, as performed by Camels; and its Application, as a Scale, to the Purposes of Geography. By James Rennell, Esq. F. R. S. Page 129

IX. On Infinite Series. By Edward Waring, M. D. F. R. S. Lucassian Professor of Mathematics in the University of Cambridge.

X. An Account of some Appearances attending the Conversion of cast into malleable Iron. In a Letter from Thomas Beddoes, M. D. to Sir Joseph Banks, Bart. P. R. S. p. 173

XI. On the Decomposition of Fixed Air. By Smithson Tennant, Esq. F. R. S. p. 182

XII. A Meteorological Journal, principally relating to Atmospheric Electricity; kept at Knightsbridge, from the 9th of May, 1789, to the 8th of May, 1790. By Mr. John Read; communicated by R. H. A. Bennet, Esq. F. R. S. p. 185

XIII. Further Experiments relating to the Decomposition of dephlogisticated and inflammable Air. By Joseph Priestley, LL.D. F. R. S. p. 213

XIV. Expe-
CONTENTS

XIV. Experiments on Human Calculi. In a Letter from Mr. Timothy Lane, F. R. S. to William Pitcairn, M. D. F. R. S. p. 223

XV. Chermes Lacc. By William Roxburgh, M. D. of Samulcotta. Communicated by Patrick Ruffell, M. D. F. R. S. p. 228

XVI. The Longitudes of Dunkirk and Paris from Greenwich, deduced from the Triangular Measurement in 1787, 1788, supposing the Earth to be an Ellipsoid. By Mr. Isaac Dalby; communicated by Charles Blagden, M. D. Sec. R. S. p. 236

XVII. On the Method of determining, from the real Probabilities of Life, the Values of contingent Reversions in which Three Lives are involved in the Survivorship. By Mr. William Morgan, F. R. S. p. 246

XVIII. Abstract of a Register of the Barometer, Thermometer, and Rain, at Lyndon in Rutland; by Thomas Barker, Esq.; with the Rain in Hampshire and Surrey; for the Year 1790. Communicated by Thomas White, Esq. F. R. S. p. 278

XIX. Description of a simple Micrometer for measuring small Angles with the Telescope. By Mr. Tiberius Cavallo, F. R. S. p. 283

XXI. Experiments and Observations to investigate the Composition of James’s Powder. By George Pearson, M. D. F. R. S.; communicated by Sir Joseph Banks, Bart. P. R. S. p. 317

XXII. An Account of some chemical Experiments on Tabasheer. By James Louis Macie, Esq. F. R. S. p. 368
