ADVERTISEMENT.

The Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March, 1752. And the grounds
of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
CONTENTS.

I. On the Ring of Saturn, and the Rotation of the fifth Satellite upon its Axis. By William Herschel, LL.D. F.R.S. Page 1

II. Miscellaneous Observations. By William Herschel, LL.D. F.R.S. p. 23

III. Experiments and Observations on the Production of Light from different Bodies, by Heat and by Attrition. By Mr. Thomas Wedgwood; communicated by Sir Joseph Banks, Bart. P.R.S. p. 28

IV. Experiments upon Heat. By Major-General Sir Benjamin Thompson, Knt. F.R.S. In a Letter to Sir Joseph Banks, Bart. P.R.S. p. 48

V. A new Suspension of the Magnetic Needle, intended for the Discovery of minute Quantities of Magnetic Attraction: also an Air Vane of great Sensibility; with new Experiments on the Magnetism of Iron Filings and Brass. By the Rev. A. Bennet, F.R.S. Communicated by the Rev. Sir Richard Kaye, Bart. F.R.S. p. 81

VI. Part of a Letter from Mr. Michael Topping, to Mr. Tiberius Cavallo, F.R.S.; with an Account of the Measurement of a Base Line upon the Sea Beach, near Porto Novo, on the Coast of Coromandel. p. 99
VII. Description of Kilburn Wells, and Analysis of their Water.
   By Mr. Joh. Godfr. Schmeisser. Communicated by Sir Joseph Banks, Bart. P.R.S. p. 115
VIII. Observations on Bees. By John Hunter, Esq. F.R.S. p. 128

A Letter from William Marsden, Esq. F.R.S. to the Secretary. p. 195

APPENDIX.

Meteorological Journal kept at the Apartments of the Royal Society, by Order of the President and Council.
THE PRESIDENT and COUNCIL of the ROYAL SOCIETY adjudged, for the year 1791, two Medals on Sir GODFREY COLEY'S Donation; one to JAMES RENNELL, Esq. F.R.S. for his Paper on the Rate of Travelling as performed by Camels, printed in the last Volume of the Philosophical Transactions; the other to JOHN ANDREW DE LUC, Esq. F.R.S. for his Improvements in Hygrometry.

ERRATUM.

P. 68, l. 23. for 2,1446 — 60,08711 read 2,14466 — 0,08711.
