PRESENTS

RECEIVED BY THE

ROYAL SOCIETY,

From November 1793 to July 1794;

WITH THE

NAMES OF THE DONORS.

1793.
Nov. 7. Nova Acta Academiae Scientiarum Imperialis Petropolitanae, Tomus VII. Petropolii, 1793. 4°
Commendationes Societatis Regiae Scientiarum Gottingensis ad A. 1791 & 1792. Gottingae, 1793.
The Morbid Anatomy of some of the most important parts of the human Body, by M. Baille. London, 1793.
A Sketch of a Plan to exterminate the casual Small-Pox from Great Britain, and to introduce general Inoculation, by J. Haygarth. London, 1793.

DONORS.
The Imperial Academy of Sciences of Petersburg.
The Royal Society of Sciences at Gottingen.
The Society for the Encouragement of Arts, Manufactures, and Commerce.
Matthew Baille, M. D.
F. R. S.
Sir Henry Englefield, Bart.
F. R. S.
The Rev. Andrew Kippis, D. D. F. R. S.
John Haygarth, M. B.
F. R. S.
William Saunders, M. D.
F. R. S.
The Rev. Francis Wollaston, LL. B. F. R. S.
James Earle, Esq. F. R. S.
The Commissioners of the Longitude.

MDCCXCIV. 3 L
Presents.

Florae Cantabrigiensi Supplementum tertium, autore R. Relihan. Cantabrigiae, 1793. 8°
Medical Facts and Observations, Vol. IV. London, 1793. 8°

A Treatise upon Gravel, and upon Gout, by M. Forbes. London, 1773. 8°
The History of Rutherglen and East-Kilbride, by D. Ure. Glasgow, 1793. 8°

J. Dickson fasciculus tertius plantarum cryptogamicarum Britannie. Londini, 1793. 4°
The Meteorologist's Assistant in keeping a Diary of the Weather. London, 1793. fol.

Annonce de la découverte d'une Science qui sert de base et de clef à toutes les autres. 4°

A Sketch of a Tour on the Continent in the Years 1786 and 1787, by J. E. Smith. London, 1793. 3 Vols. 8°

Jan. 9. Commentarii de Rebus in Scientia naturali et Medicina gestis, Volumen XXXIV. et Decadis tertiae Index. Lipsiae, 1792-3. 8°
The Life of Thomas Ruddiman, by G. Chalmers. London, 1794. 8°

A Meteorological Journal of the Year 1793, kept in London by W. Bent. London. 8°

A Hindoo Quadrant.

Feb. 6. Original Letters from the late Edward Wortley Montagu, Esq. containing Meteorological Observations made at Rosetta, in Egypt, in the Year 1773.

Meteorological Journal kept at Churchill Factory in Hudson's Bay, from Sept. 6, 1792, to April 17, 1793. Mscr. fol.

13. Some Considerations concerning public Roads. London, 1734. 8°

El Eclipse de Sol observado en el Oceano, el 24 de Junio de 1778, par D. A. de Ulloa. Madrid, 1779. 4°

Ephemerides Astronomicæ anni 1793, ad meridianum Mediolanensem supputatae, ab A. de Cesariis. Mediolani, 1792. 8°

20. Meteorological Account of the Weather at Madras, from June 1, 1787, to Dec. 31, 1790. fol. obl.

Donors.

The Rev. Richard Relihan, M. A. F. R. S.
Samuel Foart Simmons, M. D. F. R. S.
Professor Hedwig, F. R. S.

M. Bystrzycki, Astronomer to the King of Poland.
Mr. Murray Forbes.

The Rev. David Ure, M. A.
The University of Cambridge.

Mr. James Dickson.
The anonymous Author.

M. D'Eckhartshousen.

James Edward Smith, M. D. F. R. S.

Mr. Philip Hurlock, F. R. S.

George Chalmers, Esq. F. R. S.

Mr. W. Bent.

John Lloyd Williams, Esq. William Seward, Esq. F. R. S.

Don Antonio de Ulloa, F. R. S.
The Astronomers of Milan.

Mr. Chamier, of Vizagapatam.
A Diary of the Thermometer kept at Muglalore, in the Year 1790. 4° Meteorological Diary kept at Maddepollam, fol. obl.

March 6. A Translation of the Table of chemical Nomenclature proposed by de Guyton, Lavoisier, Berthollet, and de Fourcroy. London, 1794. 4°

27. Astronomisches Jahrbuch für das jahr 1796, von J. E. Bode. Berlin, 1793. 8°

10. Flora Oxoniensis, auctore J. Sibthorp. Oxoni, 1794. 8°

Mr. Chamier, of Vizagapatam.

George Pearson, M. D. F. R. S.

Don Juan Bautista Muñoz.

The Rev. Charles Peter Layard, D.D. F. R. S.

M. J. E. Bode, F. R. S.

Sir William Hamilton, K. B. F. R. S.

Andrew Duncan, M. D.

Mr. Edward Ford.

The Rev. William Maunsell, LL. D.

John Sibthorp, M. D. F. R. S.

The Linnean Society.

Comte de Hertzberg, F. R. S.

Mr. G. A. Ebell.

J. Mulder, M. D.
Presents.

The Construction and Use of a Thermometer for showing the Extremes of Temperature in the Atmosphere, during the Observer's absence, by James Six. Maidstone, 1794.

De Quadrante murali, quem speculæ Mediolanensi construxit J. Ramsden, commentarius Angeli de Cesaris.

Donors.

George May, Esq.

John Ingen-Housz, M.D. F. R. S.

Samuel Foart Simmons, M. D. F. R. S.

R. Bland, M. D.

The Rev. G. Walker, F. R. S.

The Rev. William Parker, D. D. F. R. S.

William Seward, Esq. F. R. S.

Anthony Songa, Esq.

The Astronomers of Milan.

Mr. Robert Anstice.

Mr. William Renwick.

Patrick Russell, M. D. F. R. S.

Professor Comparetti, of Padua.

George Fordyce, M. D. F. R. S.
INDEX

TO THE

PHILOSOPHICAL TRANSACTIONS

FOR THE YEAR 1794.

A

Air, on its resistance to light, — — — 86
— on its electricity, in different degrees of purity, — 267
Aldebaran, remarks on an eclipse of, — — 438
Anderson, Dr. on a wax-like substance collected by him, at Madras, — — — — 383
Annuities, on finding their values, — — 235
Anspach, Margrave of, Extract of a paper sent by him, containing an account of some remarkable caves in the principality of Bayreuth, and of the fossil bones found therein, — 402
— Observations on the fossil bones presented by him, — — — 407
Archimedes, proof of a principle assumed by him, — 33
Argand’s lamp, on the quantity of oil consumed, and of light emitted, by it, — — 98
Atwood, George, Esq. Investigations, founded on the theory of motion, for determining the times of vibration of watch balances, — — — — 119
INDEX.

B

Barker, Thomas, Esq. Abstract of a register of the barometer, thermometer, and rain, at Lyndon, in Rutland. 1793. 174
Barometer, Register of, at Lyndon, in Rutland, 174
Bayreuth, Account of some caves, and fossil bones, found in that principality, 402, 407
Bees wax, on the quantity of it consumed in the production of light, 101
--- experiments upon it, 398
Belts of Saturn, observations of, 28, 49
--- of Jupiter, remarks on, 30
Blumenbach, John Frederick, M. D. Observations on some Egyptian mummies opened in London, 177
Bones, fossil, account of some, found in the principality of Bayreuth, 402, 407
Bugg, Thomas. The latitudes and longitudes of several places in Denmark, calculated from the trigonometrical operations, 43

C

Candles, on the fluctuations of the light emitted by them, 100
Caves, account of some in the principality of Bayreuth, 402
Circle, Dr. Halley's quadrature of it improved, 217
Coccus, remarks on a species of, 383
Coloured Shadows, experiments upon, 107
Comet, account of the discovery of one, 1
Concave Eye glasses, trial of, 58
Contingent reversions, on the method of determining them, 223
Crystalline humour, observations on, 21, 201
Cuttle fish, remarks on its crystalline humour, 21

D

Dalmatia, remarks on the fossil bones found there, 412, 416
Denmark. The latitudes and longitudes of several places in that kingdom, 43
Doubler of electricity, experiments made with it, 266

E

Eclipse of the Sun, observations of, 39, 262
--- of the star Aldebaran, remarks on, 438
Egyptian mummies, observations on, 177
## INDEX.

INDEX.

Morgan, William, Esq. On the method of determining, from the real probabilities of life, the values of contingent reversions, in which three lives are involved in the survivorship, 223
Mountains in the moon, remarks on, 263
Mudge, Mr. remarks on his method of combining the action of spiral springs, 136
Mummies, observations on some, opened in London, 177
Muscle, animal, on its conversion into a substance much resembling spermaceti, 169
Muscles of the eye, on their situation, structure, and action, 207

O

Oil, on the quantities consumed by lamps of different constructions, on the quantities of different kinds consumed in the production of light, 98 101

P

Pearson, George, M. D. Observations and experiments on a wax-like substance, resembling the Pé-la of the Chinese, collected at Madras by Dr. Anderson, and called by him White Lac, 383
Pé-la of the Chinese, observations on a wax-like substance resembling it, 383
Pendulum, account of a new one, 2
Photometer, description of an instrument so called, 73
Physiognomy, of the Egyptians, remarks on, 190
Presents received by the Royal Society, from November, 1793, to July, 1794, 441

Q

Quadrature of the circle, Dr. Halley’s, improved, 217

R

Rain, register of, at Lyndon, in Rutland, 174
Read, Mr. John. Experiments and observations made with the doubler of electricity, with a view to determine its real utility, in the investigation of the electricity of atmospheric air, in different degrees of purity, 266

MDCCXCIV. 3 M
INDEX.

Reversions, contingent, on the method of determining, 223
Ring of Saturn, observations on, 53, 54, 57
Rumford, Count of. An account of a method of measuring the comparative intensities of the light emitted by luminous bodies, 67
-------------------- An account of some experiments upon coloured shadows, 107

S

Satellites of Jupiter, remarks on, 30
Saturn, observations of a quintuple belt on, 28
--------- on the rotation of, upon its axis, 48
--------- observations upon its double ring, 53, 54, 57
--------- observations of its south pole, 57
--------- observation of its five old satellites, 56

Schmeisser, Mr. John Godfrey. Account of a mineral substance, called Strontionite; in which are exhibited its external, physical, and chemical characters, 418

Schroeter, John Jerome, Esq. Observation of the great eclipse of the sun, of September 5, 1793, 262

Shadows, coloured, experiments upon, 107
Spermaceti, on the conversion of animal muscle into a substance resembling it, 169

Spirit and water, tables for reducing their quantities by weight, to measure; and for determining their proportions, 275

Squinting, remarks upon, 213
Stalactites, account of some large ones, 405
Star, appearance like one, seen in the dark part of the moon, 429, 435
Stretton, Thomas. Account of an appearance of light, seen by him, in the dark part of the moon, 435
Strontionite, account of a mineral substance, so called, 418
Sun, account of some particulars observed during its late eclipse, 39
--------- observation of its great eclipse, September 5, 1793, 262
Surviviorship, observations on, 223

T

Tables for reducing quantities by weight, of spirit and water, to measure; and for determining their proportion, 275
Tallow, on the quantity of it consumed in the production of light, 101
Thermometer, register of, at Lyndon, in Rutland, 174
Thompson, Sir Benjamin. See Count of Rumford.
Transparency of flame, remarks on, 104
INDEX.

V

Vibration of watch balances, investigations for determining the times of, 119
VINCE, the Rev. SAMUEL, A.M. Observations on the fundamental properties of the lever; with a proof of the principle assumed by Archimedes, in his demonstration, 33
Vision, observations on, 196

W

Watch balances, investigations for determining the times of their vibration, 119
Wax-like substance, from Madras, observations and experiments upon, 383
Weather of 1793, remarks on, 175
Whiteburst, Mr. observations on an apparatus of his, 15
WILKINS, WILLIAM, Esq. An account of an appearance of light, like a star, seen in the dark part of the moon, on Friday the 7th of March, 1794, 429
Woodman, Thomas B. Esq. Account of a spontaneous inflammation, 426

Y

Young, Mr. Thomas, remarks on an opinion of his, 201

From the Press of W. BULMER & Co.
Cleveland-Row, St. James's.
