PHILOSOPHICAL
TRANSACTIONS,
of the
ROYAL SOCIETY
of
LONDON.

FOR THE YEAR MDCCXCV.

PART I.

LONDON,

SOLD BY PETER ELMSLY,
PRINTER TO THE ROYAL SOCIETY.
MDCCXCV.
ADVERTISEMENT.

The Committee appointed by the Royal Society to direct the publication of the Philosophical Transactions, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations which have been made in several former Transactions, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a Body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the Transactions had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued, for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly enlarged, and their communications more numerous, it was thought advisable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such as they should judge most proper for publication in the future Transactions; which was accordingly done upon the 26th of March, 1752. And the grounds
of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answer for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a Body, upon any subject, either of Nature or Art, that comes before them. And therefore the thanks, which are frequently proposed from the Chair to be given to the authors of such papers as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices; which in some instances have been too lightly credited, to the dishonour of the Society.
CONTENTS.

I. The Croonian Lecture on Muscular Motion. By Everard Home, Esq. F. R. S. page 1

IV. An Account of the late Eruption of Mount Vesuvius. In a Letter from the Right Honourable Sir William Hamilton, K. B. F. R. S. to Sir Joseph Banks, Bart. P. R. S. p. 73

V. New Observations in further Proof of the mountainous Inequalities, Rotation, Atmosphere, and Twilight, of the Planet Venus. By John Jerome Schroeter, Esq. Communicated by George Best, Esq. F. R. S. p. 117

VI. Experiments on the Nerves, particularly on their Reproduction; and on the Spinal Marrow of living Animals. By William Cruikshank, Esq. Communicated by the late John Hunter, Esq. F. R. S. p. 177

VII. An experimental Inquiry concerning the Reproduction of
[ vi ]

Nerves. By John Highton, M. D. Communicated by Maxwell Garthshore, M. D. F. R. S. p. 190

APPENDIX.

Meteorological Journal kept at the Apartments of the Royal Society, by Order of the President and Council.
THE PRESIDENT and COUNCIL of the ROYAL SOCIETY adjudged, for the year 1794, the Medal on Sir GODFREY COPLEYS Donation, to Sig. ALESSANDRO VOLTA, Professor of Experimental Philosophy in the University of Pavia, for his several communications explanatory of certain Experiments published by Professor Galvani.
